• SECURITY

The Whirl ecosystem is built with mighty components of various kind of security forms. When enables the platform to withstand any forms of security threats. Various forms and types of Security challenges plaguing similar platform shall not withstand nor affect the unique WHIRL platform wallet.

• APPLICATIONS

With so many limitation and limited ways in which individual can access and spend their digital assets in the global applications. Various digital currencies only tend to work within an exchange environment for conversion purposes which in turn causes uproar of fees charge and undoubtedly become so inconvenience to community. With so many running already there's isn't no simple Chance for an average Man, to take advantage of the opportunity and act upon it.

• STRATEGY

The WHIRL is aiming to be the most use token in the globe. In focus towards various payment solutions. Driving the mass adoption of the Crypto currency into every corner and sides of humanity along with user engagement. The development of solutions for tracking and monitoring trade and financial services is also applied with great sources of income in various level of individual streams.

Whirl aim to achieve a platform, and a unique status of a cryptocurrency that rules the globe as the main means of payment solution in all ramifications and the globe, as well as industries and individual activities worldwide

• ABOUT WHIRL FINANCE

WHIRL FINANCE which act as a multi-coin cryptocurrency wallet that securely stores and allow users with quick and easy interaction with your crypto assets in the most simple and easy way. The Wallet which is user friendly enables users to send and receive as well as view of various balances of any supported cryptocurrency available within the address. It also enables the tracking and monitoring of assets in an eco-friendly environment of the Whirl Finance.

The product is fully decentralized and empowered users with total control over their private/phase keys. This messaged only user can access funds, and without users directives all access authorization will be denied. The unique platform which is greatly and truly mobile-friendly, supporting major cryptocurrencies like Bitcoin, BNB, Ethereum, Ripple, and over a hundred of thousands currencies available out there.

• TOKEN OVERVIEW

All activities of Whirl Finance system is supported by the unique WHIRL Token, The official currency of the Whirl Finance platform.

WHIRL which is Bep-20 compliant Token is a utility token powered by Binance Smart Chain technology, its operation is unique and go to solution network of services. It works by applying 2% fee to each transaction, which is automatically sent to burn address, Hence there's a continuously reduction of the total supply.

The token is designed to give and enable its unique holders powers and complete access to the products both available within and outside the platform for the universal services available in the Whirl platform and partners ecosystem.

With the application of a burning mechanism, the demand for Whirl is sure to grow and cause rise of value to the product. As community will be required to use the Whirl for all payment purposes and services within the platform, Whirl will also facilitate all of the operations conducted on the network along partnership channel and ecosystem.
