ABOUT PEPSI DOGE

Do you remember when, in 2015, Billy Marcus sold his DogeCoins to buy a \$ 10,000 used Honda Civic and Jackson Palmer stopped following the project for reasons not entirely clear?

What would you think if I told you that I was part of the team who created DogeCoin?

After having been completely dismissed from the idea in 2013, I reactivated my twitter account and I decided to take my cut back by joining DOGE with one of the most famous drinks in the world, giving life to the craziest idea in the whole crypto reality. Get comfortable, because this is only the beginning.

WHY PEPSI DOGE

Designed in 2013 and launched in September 2021, Doge Pepsi is the fastest-growing cryptocurrency of its kind. Doge Pepsi is decentralized and it is on a mission to bring crypto to the average person while helping to save the world from trash, plastic, pollution. Doge Pepsi has been created after doge coin with 10x faster block speeds and cheaper gas fees given that it is built on Binance Smart Chain. It is Hyper-deflationary with an integrated smart staking system built-in to reward you, so more Doge Pepsi coins are being automatically added to your wallet for each transaction.

Furthermore Doge Pepsi AutoBoost function is built mathematically to do variable buybacks which adjust based on volume in order to maintain stability.

AutoBoost will vary based on the transactions over the past 24 hours which will continue to adjust based on the volume.

Our crazy goal is to be tweeted by Elon Musk and fly to the moon.

TOKEN DISTRIBUTION

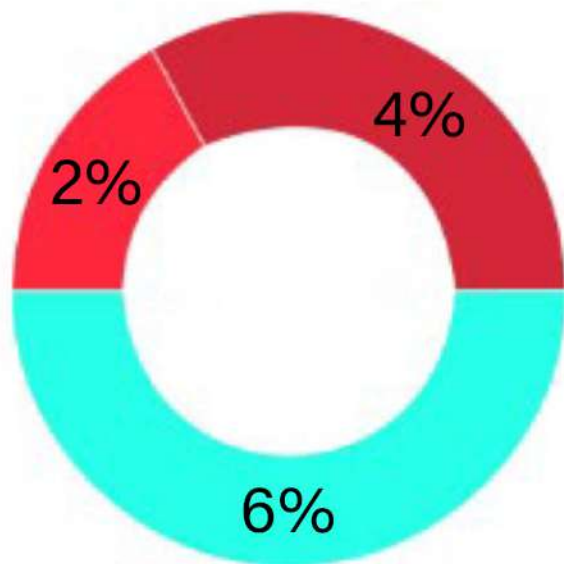

The system has created a total of
1,000,000,000,000,000 DogePepsi tokens.

The development team has optimized
distribution for maximum efficiency of the token.
