# Introduction

EverETH Whitepaper aims to educate readers on a powerful vision, unique strategy and devoted roadmap. An engineering achievement in the BSC ecosystem, we are excited to showcase the new use case that this will enable. EverETH, one of the first auto-claim Ethereum reward mechanisms on the Binance Smart Chain.

Accumulating wealth was never this simple, however the construction and design behind EverETH was to make sure that we give the ultimate rewards to those who choose to hold. We want to make sure that every design function is triggered to enable a successful token by protecting holders as our main priority.

Auto triggered Buy-Backs is a two way mechanism to ensure sustainable growth of price and volume strategically. The buybacks are triggered by each eligible sale transaction.

Rewards of 8% Ethereum selection to automatically be distributed to holders so the claimed Ethereum can then be accessible and sold without disturbing your EverETH tokens.

Automatic Liquidity pool of 2% contributes towards automatically generating further liquidity on Pancake swap. Benefiting long term for EverETH holders the most!

We have burned more than 50% of the total supply after launch and sent it to a black hole address; as this address also participates in the protocol, it accumulates more tokens, thereby effectively removing them from circulation. There is no limit to the burn, the black hole will keep growing, increasing the scarcity of EverETH.

Automatic LP as mentioned, there is a 15% tax on each transaction, 2% gets added to the liquidity on PancakeSwap through the contract. This liquidity becomes locked away and inaccessible, once again raising the price floor each and every time a transaction is made.

Fair launch of presale so everyone will buy at the same time. Just a small amount of 2% was allocated to the devs wallet and team, further protecting the community and the progression and success of EverETH.

## Tokenomics and Statistics

Total supply: 1,000,000,000,000,000  
PreSale Tokens: 320,000,000,000,000  
PreSale Date : 21st August 2021  
Min Contribution 0.1 BNB  
Max Contribution 2 BNB  
Liquidity Tokens: 192,000,000,000,000  
Marketing Tokens: 30,000,000,000,000  
Burned Tokens: 500,000,000,000,000  
Team Tokens: 20,000,000,000,000

The token contract employs a static rewards system, 15% of every transaction is broken down as follows:

- 8% BEP20 Ethereum redistributed to holders.
- 2% is used to fuel growth in the liquidity pool.
- 5% Buyback

Our superior auto-claim and auto buy-back mechanism is the driving force behind the contract:

- Rewards of 8% ETHEREUM per transaction automatically paid every 30 minutes.
- Autobuy back function to help maintain price and create stability when holders sell.
- Locked liquidity to provide holders with peace of mind that the token can always be exchanged. A trusted 3rd party, DXLock, will operate as the middle man to ensure that all raised liquidity is locked in a secure locker for the full timeframe. We will also eventually move to infinity lock for the LP tokens.

# Roadmap

- August 2021

- Contract deployment
- Public PreSALE
- Marketing Campaign
- Merchandising
- Listing on Coingecko
- Listing on CoinMarketcap
- Certik Audit

- September 2021

- Marketing team push
- Earnings tracking application development
- Listings on major cex
- Development of EverETH Wallet
- Credit Card live on our website

- October 2021

- Team meetings with community
- Team expanding worldwide
- Development of EverETH SWAP
- NFT Collection
- Community projects

- November 2021

- Formation of media team
- Sponsorship of charitable events
- Listings on Top Exchanges
- Project Partnerships

- December 2021 - Update Roadmap

- Will include EverETH VISA for 2022

## Our Vision

We have designed and built EverETH with a vision to bring together a successful token based on Ethereum due to the original thriving success as it holds currently the second highest market value behind Bitcoin and has a huge future on the market.

Our experienced team focused on offering investors a double return. Invest in EverETH, which after development will massively increase in value and gain in Ethereum which in the long run will dominate the crypto market. EverETH aims to create online spaces for members to socialize, buy, trade and invest in cryptocurrencies together while earning Ethereum.

## Values

EverETH's mission is to enrich, grow and empower our community to help them reach their goals and thrive within the crypto market. If you are new to crypto, you've picked the right place. The EverETH community is constantly growing and ripe with activity. With our dedicated team on several social media platforms, EverETH has limitless growth potential. Our team is experienced in every sector and together will make EverETH a success.

## Disclaimer

Trading cryptocurrencies carries a high level of risk, and may not be suitable for all investors. Before deciding to trade cryptocurrency you should carefully consider your investment objectives, level of experience, and risk appetite. The possibility exists that you could sustain a loss of some or all of your initial investment and therefore you should not invest money that you cannot afford to lose. You should be aware of all the risks associated with any cryptocurrency trading, and seek advice from an independent financial advisor. ICO's, IEO's, STO's and any launched coin will not guarantee a return on your investment. Since any opinions, news, research, analyses, prices, or other information contained on this website is provided as general market commentary, and does not constitute investment advice. The project team will not accept liability for any loss or damage, including without limitation to, any loss of profit, which may arise directly or indirectly from use of or reliance on such information. All opinions expressed on this site are owned by the respective writer and should never be considered as advice in any form.
