The purpose

of this Whitepaper is to provide potential purchasers with the information on PayFlow's ecosystem to allow the purchasers to make their own decision as to whether or not it wishes to proceed to purchase PFT Tokens and use any of the PayFlow ecosystem of products.

INTRODUCTION

ABOUT

PayFlow or short PFT is a BEP20 token on the Binance Smart Chain.

Competitive blockchain takes the leading role in decentralized finance.

We at PayFlow want not only to be part of the movement of decentralized finance but play an active role in exploration, development and above all implementation of this technology of the future payments.

There is still a lot of progress to be made in the practical application of crypto in payment traffic and that's what PFT is all about.

The smart contract is very advanced and the newest of its form.

Hereby ensuring the longevity of the project.

Using the frictionless technology of PayFlow we hope to lower transactions costs for corporate and private companies compared to ERC20 smart contracts, BEP20 is more cost efficient by a big margin. Gas fees are paid in BNB instead of ETH, Fast transactions for low fees!

VALUE PROPOSITION

USER EXPERIENCE

Users won't have to move their assets and key around in order to fulfill different tasks or join different DeFi projects. PayFlow will provide a one-stop platform for complete asset management.

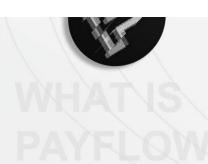

Security is the fundamental user demand of asset management. PayFlow's technology strives to protect users' assets from any malicious attacks and fraud will be reported.

P

COMPLETENESS

Usability is the key factor to drive crypto adoption. PayFlow aims to provide frictionless experiences to all kinds of users in the easiest way.

The popularization of decentralized structures has fed us to bring new innovations to have fast and secure crypto payments. While we are seeing Inge changes inside the financial economical system, we want to grow along. It has become an indispensable need to create a secure & fast crypto payment method between the holders of PayFlow. Transactions are carried out in a transparent, fair and secure manner with its decentralized structure.

We are aiming to integrate with all networks, to ease out and expand our operation for our users.

The use of PayFlow

Using PayFlow enables a smooth transaction between cryptocurrency holders, the ease of carrying out a transaction that is secure and fast without the need of having to withdraw or switching back to fiat makes it an unmissable and prominent ecosystem within the recent digital developments. Providing very low transaction fees and fast transaction convenience for PayFlow Holders.

Our goal is to function as a Digital Crypto Payment Solution. We will develop a PayFlow Payment Card and PayFlow App where you will be able to spend your PFT everywhere! PayFlow will be used to make crypto transactions between holders easy and fee free. On our PayFlow Mobile App you will be able to send, receive, stake, earn and borrow PFT tokens.
