

# iAssets Whitepaper V 0.1

## Goals

iAssets is a Decentralized Autonomous Organization (DAO) to build the Internet of Assets. iAssets aims to develop NFT-based products and services to build the Internet of Assets.

## Products and Services

### [iAssets.market](#)

In iAssets.market you can create, collect and trade digital assets. You can NFT Your ART, GIF, MUSIC, VIDEO, PATENT and DOCUMENT.

iAssets.market empowers creators with Blockchain Technology. Making it more affordable than ever to represent anything as a unique digital asset.

### [iAssets.social](#)

The first decentralized social media empowered by community and NFTs for free speech without any censorship. We are living in a world where current social media and big tech decide what we see and how to think. They censored the results of research about the risk of covid vaccines and they banned the accounts of doctors and scientists who published this information. They even banned the President of the United States, Donald Trump.

Such an action is not acceptable. iAssets.social is here to solve these problems.

# ASSET Token

The ASSET Token enables community ownership and active stewardship of the iAssets. Token holders govern the iAssets through an on-chain governance process. Users get 20% off if they pay the fees with ASSET Token on the Marketplace and Social Media. Token holders receive passive income in ETH(BEP20) just by holding +50M ASSET Tokens in their wallet.

Total Supply:

500,000,000,000 ASSET

Contract Address:
