Our Purpose

“ TO CREATE A GLOBALLY ACCEPTED TRANSACTIONAL PAYMENT TOKEN WITH REFERENCE ON REAL ESTATE. ”

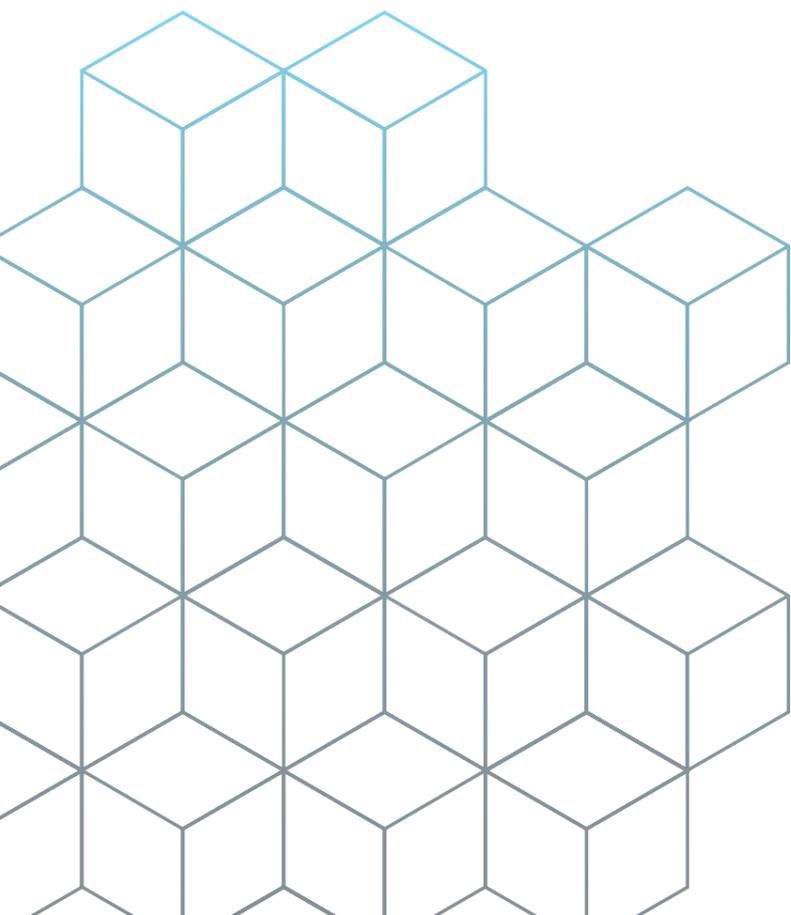

Why Blockchain

Blockchain as a financial tool

By implementing blockchain technology, we bring globalization and decentralization to the next level.

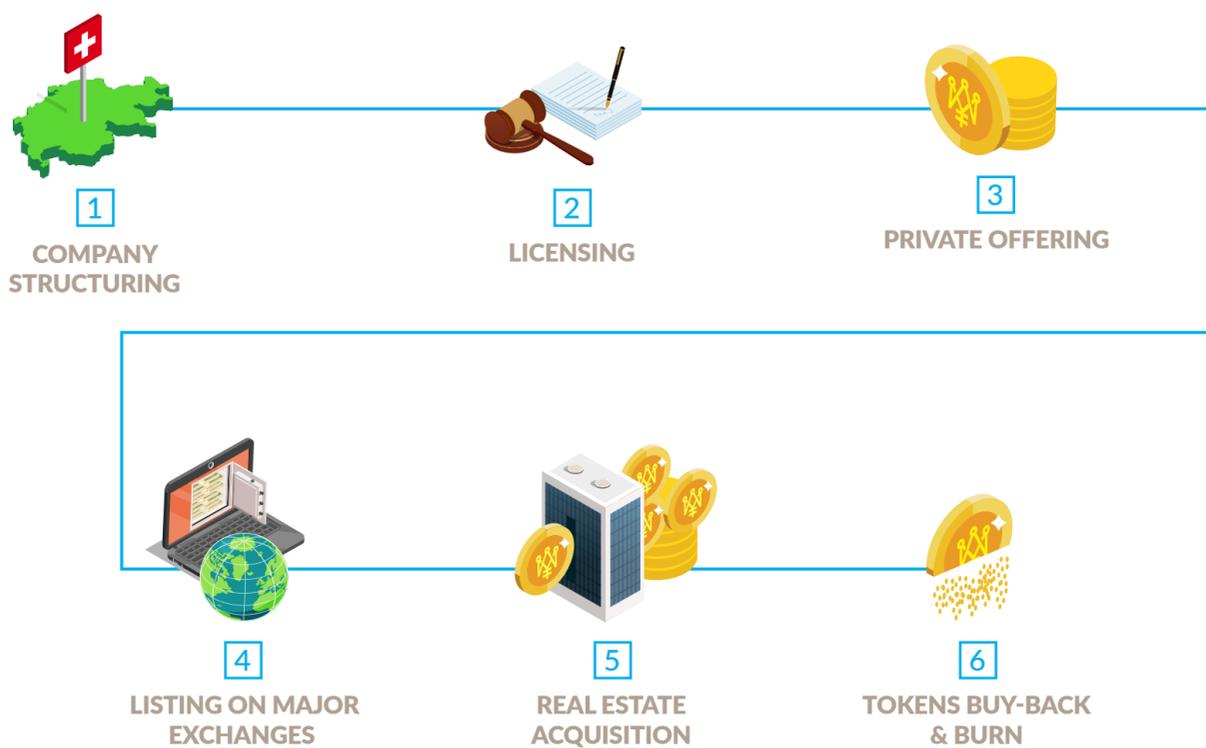

Dynasty Global Investments AG is a worldwide platform born in the Crypto Valley, an ecosystem centered in and around the Swiss canton of Zug with active connections to international centers of blockchain innovation around the globe.

Thanks to its business-friendly framework, deep talent pool and sophisticated infrastructure, Crypto Valley is quickly becoming a global center where emerging cryptographic, blockchain and other distributed ledger technologies and businesses can thrive in a safe, supportive, and vibrant environment.

The Project

We are merging our global expertise in Real Estate and Blockchain technology with the D¥NS. D¥NS is designed to accommodate a broad range of transactions. It enables holders to convert their money to and from D¥NS tokens, using the full security and convenience of blockchain technology. D¥NS provides to tokenholders an alternative to storing and transacting their tokens.

D¥NS STAND OUT FEATURES

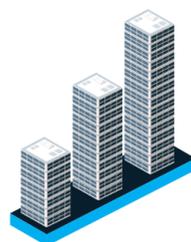

Our Smart Contract is build on the Ethereum blockchain, using token standard (ERC20)

Reduction of bureaucracy of securities exchanges, famous for **slow processes and high rates**

First-class Swiss AG Company

There is a global Real Estate market reference for D¥NS

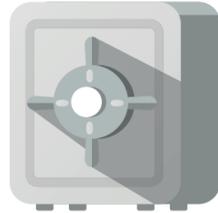

Regulatory Framework, KYC, AML, Governance and Compliance as standard procedure

The purchaser has no claim rights to the portfolio. The Real Estate properties are only used as a source of revenue to rebuy **D¥NS** tokens on the market and burn them.

Advantages

D¥NS is kept in a digital wallet, and all transactions are fully managed and validated by the blockchain technology.

D¥NS can be bought and sold easily. Fast transactions and independent from the traditional methods.

Dynasty will provide advantage for retails to accept and hold D¥NS.

D¥NS gives access to every type of crypto holder.

D¥NS can be used as a payment token and in the future, payment terminals will be compatible.

Global liquidity through the Buy-Back & Burn procedure.

No bureaucracy to enter and exit on D¥NS token once it is listed in global exchanges.

Buy-Back & Burn

How the Buy-Back & Burn procedure works?

We acquire Real Estate assets in various premium locations around the world with the funds from the sale of the D¥NS tokens. Then with the revenue incomes coming from those assets, subtracting administrative costs and expenses, we buy back D¥NS tokens on a quarterly basis in the exchanges where it is listed. Finally, we transfer those tokens to Dynasty's treasury into a Burn wallet that is specified in our smart contract. Thereby, when the D¥NS tokens enter the Burn wallet they are burnt, that means, they are destroyed forever in the Blockchain and therefore taken out of circulation.

Considerations

D¥NS Tokens

Each D¥NS represents payment token with buy-back & burn function activated provided by the real estate portfolio.

Accordingly, D¥NS is not to be purchased with a view to profit on potential appreciation of D¥NS themselves.

D¥NS do not represent an investment contract in the Dynasty Platform.

D¥NS do not have and do not offer any redemption right on the real estate assets

D¥NS do not provide any claim on the property

D¥NS do not give assets property rights to its holder

D¥NS do not guarantee any returns to the token holders

This concept is fundamental to the objective of the Dynasty Platform

Dynasty tokens (D¥NS) are the tokens issued at the Dynasty platform to allow global token transactions. D¥NS are issued on the Ethereum platform by means of the ERC20 smart contract.

Dynasty will not offer the D¥NS in the U.S. and other jurisdictions considered not friendly to crypto at this moment but will take all necessary steps to facilitate D¥NS trades being fully compliant with all local laws and regulations in the future where we intent to trade.

Data protection

Sale and purchase of D¥NS at the Dynasty platform requires personal data. All personal data collected by Dynasty are detailed and should be accepted when a customer becomes a D¥NS holder. Details on that information can be found on the Privacy Policy and Terms of Use.

Dynasty platform is based on Blockchain technology. Blockchain does not allow deleting personal data about any transaction. Dynasty Membership implies user to grant Dynasty a waiver from using her/his rights to require removal of any transactional data from Blockchain.

DGI is committed to manage possible legal and regulatory risks by working closely with top notch international law firms to protect its users.

Governance

A strict legal and governance structure has been set up to ensure the use of proceeds from tokenholders. Our preferred service providers and advisors are among the leading firms on their areas.

KYC and anti-fraud

As our focus is to be a global business, Dynasty is investing in know-your client (KYC) and anti-money-laundry (AML) practices making our business model transparent and safe with minimum risks for our members and tokenholders.

In order to ensure that our services are not utilized by unwanted and illegal elements to further their illegal motives, we intend to facilitate our operations by means of:

(i) obtaining detailed information about our members and verifying the customer's identity on private sale and primary sale only; (ii) conducting due diligence of the assets tradable at the Dynasty platform; Finally, Dynasty reserve the rights to ban suspicious customers and block any operation that doesn't attend our compliance policies.

Legal implications

Before acquire D¥NS tokens, the buyers should check if in its jurisdiction the possession and trade are legal. The buyer is responsible for complying with all local applicable laws, regulations and taxes to which they are subject to.
