Introduction

In our view, cryptocurrency is future.

- Are you a beginner to crypto world?
- Are you worried about security in cryptocurrencies transactions?
- Have you ever missed the right window to buy/sell your cryptocurrencies?
- Do you travel or busy with work and won't be able to buy/sell cryptocurrencies?
- Don't you have access to computer/internet around the clock?

We have an answer for you!

IDOM is multi-crypto exchange with easy-to-use UI, at-most security features and optimized transaction speed and ability.

Problem statement

Before I start with the problems, I would like to say that **IDOM Exchange will be one stop solution to all the problems mentioned below.**

Many crypto exchanges encounter the following problems:

- **Restriction in supported trading pairs of coins:**

Almost all exchanges support only BTC and ETH for buying or selling any coin in their exchanges.

“Why can't I exchange any coin to any coin in any exchange?”

- **Security issues in the platform**

Security is one of the biggest concern in digital world. Crypto-exchanges are not an exception. According to CoinGecko, a whopping \$606 million worth of cryptocurrencies have been lost so far, with most of these losses happening through exchanges. Many exchanges went down/closed because of hacking¹.

- **Poor technical architecture**

Many exchanges are developed by technically strong team using cutting edge technologies, but they have little or no experience in finance or in operating an exchange. In most cases, their first and foremost goal is to develop a running software. But over the period, because of factors like security, speed, scalability and many more, they can't satisfy the market demands.

- **Dependencies on third-party trading bots**

Many traders relying on trade bots to perform automated trades and transactions. But unfortunately, not many exchanges have their own trading bots. So, traders should opt for third-party trading bots which might not the optimal solution for any exchange.

- **Missing portfolio management**

Anyone who is investing would love to know how well his/her investments are doing and what their real value is. To make calculated investments and clever moves, portfolio management comes handy always. How many exchanges comes with portfolio management.

- **Poor internationalization and language support**

Blockchains have no borders. Most exchanges focus only on one language or one country.

IDOM Exchange

Outline of the Vision

"Keep it simple, smart"

One of the biggest challenge in developing anything is "Keeping it simple". IDOM's UI will be beginner friendly and everyone can use it with ease.

Our IDOM Exchange will be one place where you can everything related to cryptocurrency, simply all under one roof.

IDOM Features list

- Any coin to any coin exchange
- Spot trading
- Margin trading
- Anonymous instant exchange
- Decentralized (on-chain) exchange.
- Layered security approach
- Built-in bots
- Portfolio management.

Supported trading pairs of coins (UNIQUE FEATURE)

The highlight of our exchange is supporting **any coin to any coin exchange**.

Supported devices

- Web-based trading platform (in Windows, Linux)
- Android platform
- iOS platform

Supported Coins

IDOM will support the following coins:

- BTC
- ETH
- LTC
- NEO
- XRP
- BNB
- IDOM (IDOM Coin)
- ...

More coins will be added in future. We will add the coins which has very good credibility, user base, and liquidity.

In case, if you wish to list your coin on IDOM later, you can benefit by participating in our ICO.

Security features

We take security seriously. IDOM will be built to the highest standards and well tested. We have more than one level of security to give the users maximum protection against any kind of hacking or threats.

Here is the list of security features that is planned:

- Password
- Email
- 2-Factor Authentication
- IP Activity
- Bug Bounty program

Built-in trading bots to automate your transactions.

We have built-in trading bots to assist you in buying/selling your cryptocurrencies. You can set all the parameters in the bot and we will take care of the rest.

You can also define whether to

- Only notify you when certain conditions are reached and do nothing.
OR
- Perform buy/sell when certain conditions are reached directly.

Bot's UI is one the simplest and easy-to-use interface.

Portfolio management

IDOM's portfolio management shows you how your coins are performing. In addition to the cryptocurrencies that you have in our IDOM exchange, you might have cryptocurrencies in other wallets too. You can manually enter the details of those coins in other wallets in your portfolio. Our portfolio management shows you performance of your cryptocurrencies graphically and as list.

In addition to this, we show you top and least performing coins, so you can decide on your strategy. This is huge bonus for intra-day traders.

Optimization and scalability

“There is always space for improvement”

Our team have experience in both finance and crypto industry for many years. Our team is specialized in optimizing the product to the maximum. We keep optimizing the products we develop to serve the current market needs.

All our products have groundbreaking architecture which enables us to scale any level. IDOM's team always strive for scalable products. With their incredible experience and brainstorming, they always come up with optimized scalable solutions.

Multilingual Support

We can support the global market seamlessly. We will support English, German, Chinese, Japanese and Korean on all our user interfaces. The very initial release will be in English only. More languages are planned.

Revenue Model

IDOM will generate revenue from the following sources:

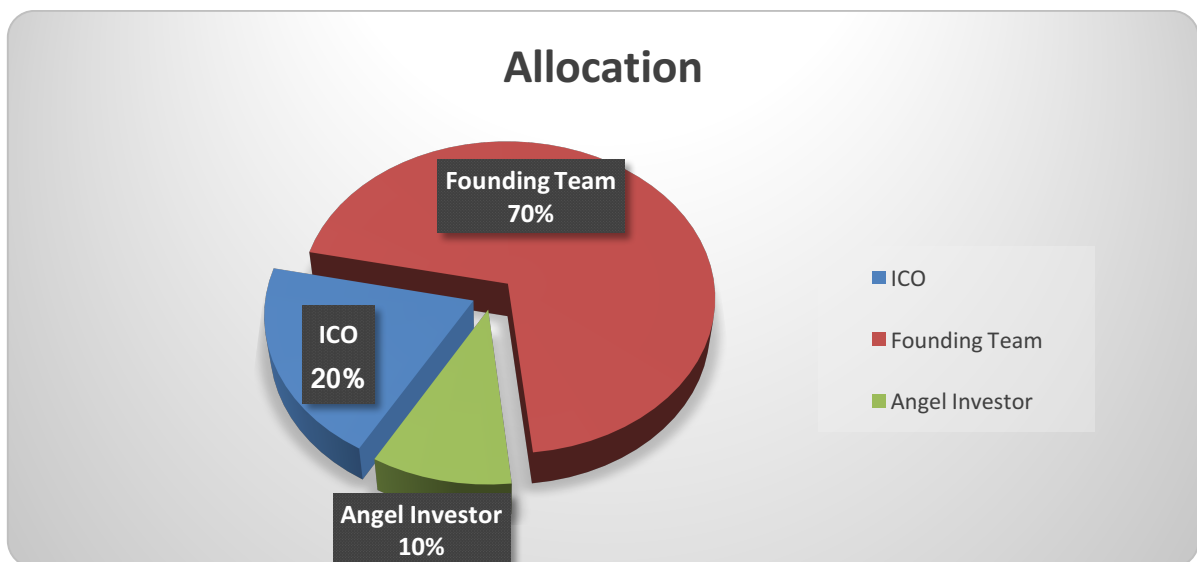

Source	Description
Exchange Fee	IDOM initially will charge a 0.1% fixed fee per trade. Lowest in the market.
Withdrawal Fee	No withdrawal fees
Listing Fee	IDOM may charge a small fee for listing your coin
Margin Fee	If you trade on margin, there may be a fee or interest on the borrowed amount.
Other Fees	There may be other fees the platform may collect for various services such as automated algorithmic order etc.

IDOM Coin (IDOM)

We will issue our coin IDOM Coin. A strict limit of 1,600,000,000 IDOM will be created, never to be increased. IDOM will run natively on the Ethereum blockchain with ERC 20.
