ABSTRACT!!

RSI (pronounced Relative Strengthening Index Token) is a concept for a decentralized professional networking community project. We aim to encourage the current status of professional data analytics through the community, investments, used Services of RSI users through a global agreement. Using the RSI Token to purchase and send or receive Tokens using The blockchain network. RSI seeks to offer a trust where the everyday person can securely connect with others , and effectively contribute too their place of network for the emerging blockchain ecosystem.

RSI Token is a blockchain based implementation that strives to improve the accessibility of cryptocurrency and its related technologies by spurring with an evolution of the Blockchain Network through research, innovation, and dedication.

The leading problem facing digital currencies is that people lack the technical knowledge to take advantage of them. RSI goals are centered around the idea of network use, a place which simplifies the process, and creates a more intuitive experience for everyone using the Token.

In order to achieve this, and prepare for mass adoption, RSI will take the existing work of the Ethereum network, and further adopt its capabilities, and stability. A multi-community driven network will lay the foundation for this process, bringing the concepts of decentralized currency, applications, and governance to a higher purpose.

MAIN WORK:

RSI Token is a new P2P network friendly and vested digital currency designed to unite all interested users for exchange and transfer of money to any point of the world by bypassing centralized payments systems which are outdated and hard too use.

PROBLEM SENTIMENT

Presently, tens of millions of people legitimately own cryptocurrencies. Hundreds of millions around the world are aware of cryptocurrencies and would like to obtain them. Many view crypto as a means of investment with stunning returns, and others see benefits of seamless digital transactions and new business opportunities afforded by blockchain technology.

Mass adoption of cryptocurrencies is inevitable and imminent. The cause and credit is owed to many trail-blazing entrepreneurs and visionaries, including the source of our inspiration and object of deepest respect, social media. The moment of mass adoption will definitely come sooner rather than later. Consumers need a simple, fast and safe means of digital cryptocurrency. Capitalization fluctuates around \$300 billion.

Yet the governments, banks, and international payment systems around the world drag their feet in establishing clear rules of regulating crypto transactions to enable law-abiding citizens buying and selling physical goods using their digital assets. A large portion of \$300 billion is ripe for spending - conversion into physical assets. The goal of our company is to empower consumers around the world to participate in crypto and to enjoy the purchasing power of their crypto investments. RSI Token is a digital marketplace where the people and communities can freely and securely buy and sell goods for cryptocurrency.

More and more investors are acting on the feed-backend insights provided through new media channels, meaning that the sentiment of the market has a much stronger influence on blockchain assets compared to fiat currency assets.

Without knowing the sentiment of the market, investors are missing crucial information required to make informed, accurate investment decisions.

RSI will Factor in their level of influence on the market. RSI will also identify and weigh opinions based on the credibility of their market influence.

VISION

Many people want a simple and safe way to obtain a stake in cryptocurrency, but do not know how. They are not miners, not speculators, just individuals who seek added value in investing in cryptocurrency. The number of cryptocurrency owners is projected to increase from a current 22 million to over 250 million by 2020. Yet these same people are very comfortable with buying and selling on social media channels, Amazon, WeChat, facebook, Twitter and the like. In 2016, marketplaces accounted for 44% of the world's \$2.44 trillion spent online in 2016. Cryptocurrency wallets are primarily concentrated on mobile devices, with over 65% of wallets being mobile. Global smartphone penetration is projected to reach 37% by 2020. Global population of digital buyers will surpass 2 billion people by 2020.

Cryptocurrency is the future, so why keep using old methods to predict the market!!

2017 proved the dynamism of cryptocurrency markets. As prices climbed, traditionally skilled investment analysts could not agree on when growth rates would change.

Traditional market analysis is based on trends and movements. Mathematic and economic principles are used to measure the forces of supply and demand, with historical patterns and intrinsic value playing a key role. These types of analysis are perfect for relatively stable assets, with common intrinsic value, such as property and commodities - however, cryptocurrencies are different. Crypto-related investments are a new type of investment that is intangible in nature. Some may be built on a technology used today, while others are built on a great idea or prototype. This is why cryptocurrency and blockchain investments create conversations -they create excitement, opinions, beliefs, bias and most of all, emotion. It is these conversations and speculations that often have the most effect on cryptocurrency.

Traditionally this type of data is known as "market confidence" or "market sentiment". This is highly valuable, but was exceptionally hard to quantitatively analyze at scale given its qualitative nature. Accurate measurement of market sentiment can therefore lead to more accurate predictions of cryptocurrency price movements.

RSI uses methods of Insights gathered from market and community sentiment and social investment sentiment. Scanning the internet for sentiment data in real-time, carefully discerning tone and author credibility.

USE CASE.

Much like the Internet was in its infancy, Blockchain isn't something we should be afraid of. In fact, until now, it has been misunderstood. The possible networking and growth are so vast however, that blockchain is now recognized as being revolutionary for every aspect of our digital lives.

To simplify this into a solution, imagine an endless spreadsheet. Rather than saving this spreadsheet on your own computer, it is decentralized and encrypted on many computers across a vast network. Not only does this make your information secure by having it infinitely backed-up, but no one has the ability to corrupt or access the data without your personal key.

Not only does RSI ethereum based blockchain embody these secure and stable attributes, but it has been running since 2014, an eternity when it comes to technology advancement. Focused on growth and multiplication RSI comes with a community and supportive network of tech pros that have been working with the blockchain since its inception. RSI is more than just a transaction. RSI is the future, with significant technological implications for growth, supply, chain management and much more.

Blockchain allows for:

Decentralized initiation, settlement and fulfillment of transactions. Payments are immediate upon performance under carefully crafted smart contracts.

RSI was based on the ethereum blockchain to support others interface and integrate into a crypto economy. We have experts on our team to motion this ever growing digital space.

The Token is backed by a distributed team of technology professionals who are here to help, support, educate, and integrate. RSI is the leading edge of applying blockchain technology to everyday use.

TEAMS AIM

RSI is building a dedicated system for anyone to participate. RSI will not only be used in around its users but also by groups and communities that wish too take part in the ecosystem of RSI.

RSI is using blockchain which utilizes transparency purposes while proving immutable ownership of digital data.

RSI is constantly evolving and we are always looking at ways we can add value to the RSI ecosystem.

As with any growing ecosystem, we value functionality and look into maximizing the use cases within the network. With the Peer to-Peer Marketplace, all movements of value within this network will be made with ease in the networks native currency. The marketplace is designed to be a complete peer-to-peer solution where users will be able to buy and sell products and services in a completely secured environment.

RSI has a goal to be as user-friendly as possible whilst providing a stable return for its investors. All aspects of the ethereum network are carefully analyzed and under development to reach a simple use for everyone without requiring advanced technical knowledge to operate.

The solutions introduced with RSI is aiming at improving the Overall functionality and usability with a ultimate goal of partaking in the ecosystem. RSI Token along with a enhanced network security are just the beginning of setting up the environment for future development in this generation.

MAKING A DIFFERENCE

The global RSI Token Marketplace, powered by Ethereum blockchain and the exchange traded RSI Tokens, enables these endeavors with peer-to-peer smart contracts for buying and selling of cryptocurrency related coins like eth or bitcoin. Sellers are interested to receive cryptocurrency for their wares. Utility of settlement + Investment vehicle = mass adoption of digital currency; Buyers are realizing the cryptocurrency investment gains and purchasing power, yet are spared the pain and risks of switching between crypto and fiat currency; Smart contracts ensure that transactions are seamless, secure, enforceable, transparent and decentralized.

The smart contract technology allows the RSI Token Marketplace, to ensure safety, executability, intractability and verifiability of a transaction, successfully facilitating peer to-peer transactions. As regulation concerning acceptance of digital currencies in a B2C arena evolves, the marketplace will add business sellers and buyers to its roster. The smart contracts will obliterate many existing intermediaries, the leeches of value chains. The delivery economy facilitates explosive growth in the form of direct adding value too each layer of person using the RSI network.

RSI is heavily aimed at improving peer too peer cashless transactions by bringing in and encouraging a community that enforces and upholds the RSI code and also by partaking and influencing new members too become part of a ever growing blockchain generation.

We believe that all people are equal and all deserve a share of information which enables us too grow together and expand our terminology and renewed thinking. We are constantly on the verge of newer creations and improvements that co -exist outside the realms of the real world. The challenges we face are always a new step towards a greater and yet safer future.

Token Dtails

Token Paramters:

Role of Token	Community Investment Token
Token Abbreviation	RSI
Token Name	Relative Strengthening Index Token
Emmision Rate	No New Tokens Ever Made
Maximum Supply	18,400,000 Token
Token Network	ERC20 ETHEREUM

Token Distrubution:

Maximum of Token Supply is Distributed as Follows:

	Per Cent of Maximum supply	Maximum Of Quantity
Public placement (ICO)	75%	13,800,000
Team Allocation	3%	552,000
Community & Bonuses	7%	1,288,000
reserved After ICO	15%	2,760,000
Total Amount	100%	18,400,000

Public Token Sale Details:

Tokens will be offered to the public in a Three stage process within general terms of the RSI Token. RSI Could Reserve the right too assign a longer stage process where Tokens can be sold at a more frequent pace too ensure an ICO successful completion.

RSI Tokesn will be distributed within the first 24 hours of receival of payment

General terms of the RSI TOKEN sale are as follows (estimated dates, may be subject to change):

Bonus & Discount Round 1

GMT + 9:30

Begins: 03 September 2018 07:29 AM

Ends: 21 October 2018 07:30 AM

Discount Round 2

Begins: 21 October 2018 07:30 AM

Ends: 23 November 2018 07:31 AM

No Discount Round 3

Begins: 23 November 2018 07:31 AM

Ends: 19 January 2018 07:30 AM

Soft Cap: 2800 ETH

Hard Cap (Maximum Supply): 12500 ETH

Minimum Transaction Amount: 0,01 ETH

Token Price: 0,0010 ETH

- Unsold Tokens

Tokens are minted only upon payment with ETH, thus no unsold Coins will be created at the close of coin-generation event.

- Token Payment Methods

We accept only ETH from ERC-20 token standard wallets, sending ETH from exchanges may result in a loss of your funds.

- Team Vesting, Anti-Dumping Measures

RSI team allocation of RSI is intended to be locked for the first three months after the date of distribution, and will be vested over a period of 12 months following the end of lock-up period, at 25% each quarter.

- Reserve Pool

During the initial stage of RSI Marketplace development, at least 15% of the entire supply will be retained by RSI Reserve Pool to protect the nascent from speculative trading and to maintain flexibility at the early stages of the evolution of the ecosystem. The RSI Reserve Pool may be released in limited allotments by decision of the Board of Directors to ensure the long-term returns and liquidity for RSI community.

RSI has already weighed in Most of Its Bonuses and Discounts we believe in offering Stable discounts and bonuses too our Buyers to make a fair par between the Investors.

Token sale will lead for a no longer period of time allocated.

How to Buy RSI:

Users wishing to purchase RSI directly from the ICO will need an Ethereum wallet. Users will need any non-exchange ETH wallet to request RSI. This ETH wallet will generate a personalized ETH address. When RSI Token buying becomes enabled for users, users will be able to specify the quantity of ETH they would like to exchange for RSI.

Exchange Listing:

We are undergoing the listing process on four major exchanges. These undertakings will be completed within reasonable timeframe of the finalization.

TEAM.

Ryan Charlton:

(Business Representative) and Co Founder : Ryan Charlton has worked for Several Investment companies based in Australia one of Them being AFIC Running leader for investment portfolios and Small too large scale Business operations. He has previous experience as an entrepreneur self made company by the name of "Time is Money". Ryan graduated with a B.S. in Economics and management magna cum laude. Most recently, he has served as a managing partner of BITTransfer, a blockchain and emerging technologies advisory firm. It was in this role where he learned about the growing importance of the personal data monetization industry in the global blockchain economy. He has had a great degree of experience with Blockchain related ventures and bought his first bitcoin in 2014.

Sean Goodman:

Designing and Development of RSI: Sean Goodman has been designing smart contracts for more than three years. He studied biomedical engineering and seeks to combine high quality design with fields employing superior technology and scientific methods. He Has spent most of his career recently working as a Full Stack Developer. Sean Goodman posses the skills too push Blockchain and it Related Tasks Through too success.

Aaron Looper:

Content Creation Marketing Sales and Support:

Spent time at Google, where he designs both web-based and mobile-based websites and advertising. He has also Runs several support related queries through Business scale Channels and has chosen too adopt his skills within Blockchain Related Goals.

CONCLUSION!

In order for this to happen we must start small, we must understand and embrace our limitations as actors of change. Once we show success we will continue to be agile in facing and solving new barriers that present themselves.

The current status of governance and promise is a global issue yes, but the solution lies in each community. We welcome all insight, feedback, and collaboration. We believe we will help shape the world's future and in doing so make the world a better place for us all.

Risks(Terms and Conditions).

By purchasing, holding, and using RSI Token and/or the website, you expressly acknowledge and assume the following risks:

CERTAIN RISKS RELATING TO PURCHASE, SALE, AND USE OF RSI TOKENS

Important Note: As noted elsewhere in these terms, the RSI Tokens are not being structured or sold as securities or any other form of investment product. Accordingly, none of the information presented in this whitepaper is intended to form the basis for any investment decision, and no specific recommendations are intended. The Company expressly disclaims any and all responsibility for any direct or consequential loss or damage of any kind whatsoever arising directly or indirectly from: (i) reliance on any information contained in this whitepaper, (ii) any error, omission, or inaccuracy in any such information, or (iii) any action resulting from such information.

RISK OF LOSING ACCESS TO RSI TOKENS DUE TO LOSS OF PRIVATE KEY(S), CUSTODIAL ERROR, OR PURCHASER ERROR

A private key, or a combination of private keys, is necessary to control and dispose of RSI Tokens stored in your digital wallet or vault. Accordingly, loss of requisite private key(s) associated with your digital wallet or vault storing RSI Tokens will result in loss of such RSI Tokens. Moreover, any third party that gains access to such private key(s), including access gained to login credentials of a digital wallet service you use, may be able to misappropriate your RSI Tokens. Any errors or malfunctions caused by, or otherwise related to, the digital wallet or vault you choose to receive and store RSI Tokens on, including your own failure to properly maintain or use such digital wallet or vault, may also result in the loss of your RSI Tokens. Additionally, your failure to precisely follow the procedures set forth in the ICO website — for instance, if you provide the wrong address for receiving RSI Tokens — may result in the loss of your RSI Tokens.

RISKS ASSOCIATED WITH THE ETHEREUM PROTOCOL

Because RSI Tokens are based on the Ethereum protocol, any malfunction, breakdown, or abandonment of the Ethereum protocol may have a material adverse effect on the RSI Token. Moreover, advances in cryptography, or technical advances such as the development of quantum computing, could present risks to RSI, including the utility of RSI Tokens for obtaining services, by rendering ineffective the cryptographic consensus mechanism that underpins the Ethereum protocol.

RISK OF MINING ATTACKS

As with other decentralized, cryptographic tokens based on the Ethereum protocol, RSI Tokens are susceptible to attacks by miners in the course of validating RSI transactions on the Ethereum blockchain, including, but not limited to: double-spend attacks, majority mining Power attacks and self-mining attacks.

Legal Disclaimer.

This Whitepaper is for information purposes only and may be subject to change. By participating in RSI Token event you understand and irrevocably agree with the disclaimer set out below and Terms and Conditions ("Terms") of RSI Token. RSI cannot guarantee the accuracy of the statements made or conclusions reached in this Whitepaper. RSI Token does not make and expressly disclaims all representations and warranties (whether express or implied by statute or otherwise) whatsoever, including but not limited to:

- any representations or warranties relating to merchantability, fitness for a particular purpose, description, suitability or non-infringement;
- that the contents of this document are accurate and free from any errors; and - that such contents do not infringe any third party rights.

RSI Tokens shall have no liability for damages of any kind arising out of the use, reference to or reliance on the contents of this Whitepaper. This Whitepaper may contain references to third-party data and industry publications. As far as RSI Token is aware, the information reproduced in this Whitepaper is accurate and that its estimates and assumptions are reasonable. However, there are no assurances as to the accuracy or completeness of this information.

Although information and data reproduced in this Whitepaper are believed to have been obtained from reliable sources, we have not independently verified any of the information or data from third party sources referred to in this Whitepaper or ascertained the underlying assumptions relied upon by such sources. As of the date of publication of this Whitepaper and Terms RSI Token(also further "Tokens" / "RSI" /"RSI Tokens") have no known potential uses outside of the RSI ecosystem.

This Whitepaper does not constitute advice nor a recommendation by RSI Token, its officers, directors, managers, employees, agents, or consultants, or any other person to any recipient of this Whitepaper on the merits of participation in the RSI Token.Participation in the RSI Token carries substantial risk that could lead to a loss of all or a substantial portion of funds contributed

No promises of future performance or value are or will be made with respect to Tokens,including no promise of inherent value, no promise of continuing payments, and no guarantee that RSI Tokens will hold any particular value. Unless prospective participants fully understand and accept the nature of RSI Tokens proposed business and the potential risks inherent in RSI Token, they should not participate in the RSI Token. RSI Tokens are not being structured or sold as securities. RSI Tokens are not a participation in RSI and RSI Tokens hold no rights in RSI or in case of formation of any legal entity based on RSI Token.
