About SafuFide

SafuFide offers digital asset protection to both consumers and DeFi token projects. The SafuFide's Safe-Sig™ software allows users to protect their digital assets, and those of family and friends, via a **multisig wallet**. Safe-Sig provides a simple program for setting up multisig wallets to protect assets, LP (Liquidity Provider), contest tokens, tokens held for future development and others.

Like traditional checking accounts that need multiple signatures to cash checks at a bank, SafuFide's Safe-Sig™ protects token holders by requiring multiple sign offs with each transaction. Protect your Digital Assets in minutes with a click of a button!

SafuFide's Safe-Sig™ launched Nov 2021 with the token launch on **November 30, 2021**.

The SafuFide DAO is "governance in a box". With SafuFide's DAO projects can avoid issues that may hamper their long-term outlook and growth. The DAO offers smart contract audits, DEV team verification, a transparent governance platform, multisig wallets to manage settings and project development guidance. Many pre-launch decisions made in development can unwittingly harm the project as it grows and SafuFide's DAO solves this issue by providing a guide that allows the developing team to avoid critical errors or miss massive opportunities. As they say, "You don't know what you don't know." Luckily SafuFide knows.

Tokenomics

*Fees to be commerce based on the use of SafuFide service

Total Supply
10 Billion (10,000,000,000)

Total Tax **9%**

4% - LP (Liquidity Pool)

2% - Staking Pool

3% - Marketing/ Development

10 - 30% Burning will come from Revenue taking place on a monthly basis. Voting will be done on the DAO.

*The Staking App has an estimated start time of 2-3 weeks after the launch of the SAFEST token on PancakeSwap. Details to come.
