INTRODUCTION

The Cryptocurrency universe is a breeding ground for new decentralized and innovative systems that will bring solutions to some of the most important issues in the world. We are going to make cryptocurrency easy by making it a one place stop for all your cryptocurrency needs. The team behind Seamlessswap wants to lead the way of the eco- system and help bridge the power of cryptocurrency with the challenges of the decentralized financial system in the world today.

Seamlessswap is a Binance Smart Chain-based cryptocurrency with a one-of-a-kind rewards platform with maximum payouts through a gaming platform, where buyers and sellers meet to transact based on long-term speculative and value views.

Seamlessswap is based on Binance Smart Chain BSC (BEP20). This ecosystem is based upon automatic Rewards, LP Acquisition and Yield Farming . LP Acquisition is advantageous in cryptocurrency as it generates rewards by holding the coin and also generates a passive income. Seamlessswap also provides multifunction for the user, with a secure platform for Ultra-fast transactions, lower fees than other coins and a burning function. Seamlessswap is an eco-friendly currency that does not want to damage the environment, so that's why it disabled the mining function. No one can mine Seamlessswap.

Every transaction in the Seamlessswap protocol leads to the automated creation of liquidity within the PancakeSwap LP, which operates on the concept of automatic LP. Seamlessswap distributes RFI static benefits to holders through static reflection, resulting in a continuous increase of their balance. Finally, Seamlessswap uses a manual burn approach, with burns managed by the team and promoted depending on performance. This is advantageous for long-term participants and helps to keep the community informed and rewarded.

VISION

We aspire to put “cryptocurrency in every portfolio.” We envision a world where wealth building strategies that were once only accessible to affluent individuals become available to everyone, transferring the power over our financial systems back to the people. Seamlessswap is going to create a revolutionary ecosystem to bring more people into digital assets, building a safe and secure platform that is positioned for global adoption with no limitations helping to earn a handsome income through Holding and betting along with maintaining their privacy, security and autonomy. We strive to create an ecosystem based on sound monetary policies, with a sound and solid decentralized foundation, that should be expected with the Seamlessswap platform.

ECOSYSTEM

Seamlessswap is a decentralized finance (Defi) token on the Binance eco system, with three functions that take place during each trade: Reflection, Liquidity Pool (LP) Acquisition and Burn. These functions work together to overcome messy problems caused by farming rewards and price fluctuations. That is nearing the Binance user ceiling and its growth is unsustainable. We believe that Seamlessswap will see exponential growth, just as Seamlessswap has, and Seamlessswap token hopes to generate immense value for our community by taking advantage of this opportunity.

REFLECTION

Also known as static rewards, static rewards aims to prevent price collapses and valuation bubble busts caused by liquidity provider (LP) farming rewards. Manual burns assist in rewarding and informing the community. The manual burns circumstances and quantities are publicized and monitored. During larger collapses, this automatic liquidity pool offers stability. When whales sell big positions, automatic LP keeps the price from drastically fluctuating.

WHY STATIC?

The reflected method successfully enables token holders to hold their holdings depending on percentages completed and total coins owned by owners. Static rewards play an important part in addressing a variety of issues to provide investors with earnings, depending on the number of coins exchanged in the market. This method is designed to satisfy early adopters who want to sell their tokens after earning high APYs.

This method attempts to relieve some of the negative sell pressure on the coins that have been created by early adopters selling their tokens after harvesting insanely high APYs. Second, the reflecting mechanism encourages holders to keep their coins to earn greater kickbacks, which are calculated as a proportion of the total tokens owned by the owner.

BURNING

Sometimes burns are important, and sometimes they aren't. In the early days of a cryptocurrency, a continuous burn on a single protocol may be convenient, but it implies the burn cannot be limited or regulated in any manner. Burns that are managed by the team and elevated based on accomplishments assist to keep the community informed and rewarded. The conditions and proportions of the automatic burn may be marketed and monitored. Seamlessswap intends to execute a long-term burn strategy that is both helpful and gratifying for people who participate. Furthermore, manual burns assist in rewarding and informing for the Seamlessswap community. The manual burn's circumstances and quantities are publicized and monitored. 2% Burning of Seamlessswap token will continue after every transaction. Burnt tokens are shown on our website readout, allowing for more transparency in determining the current circulating supply at anyone moment

LIQUIDITY

Liquidity providers receive LP coins for providing liquidity. Users pay fees for trading on DEV, which is allocated to liquidity providers depending on the quantity of LP coins or percent share they own in the pool. LP may suffer a temporary loss as a result of providing liquidity, and they may not get the same number of coins back.

The Seamlessswap token protocol guarantees that coin holders' assets are immediately taken and locked for liquidity. The primary goal is to keep the holder informed about the Seamlessswap token performance by avoiding whale dips when they are used in a mass trade off.

Seamlessswap token secret is an automatic LP. We have a function here that serves as a dual beneficial implementation for holders. To begin, the contract collects token from both sellers and purchasers and adds them to the LP, establishing a stable price floor. Secondly, the penalty serves as an arbitrage-resistant mechanism, ensuring that the volume of Seamlessswap token remains safe as a reward for the holders. In principle, the additional LP provides stability by adding the tax to the coin's total liquidity, thus, raising the coin's overall LP and maintaining the coin's price floor.

This differs from another reflection of coins burn functions, which benefits only in the near term from the given supply decrease. The price stability of the Seamlessswap LP mimics this function, with the added advantage of a firm price floor and cushion for holders. The aim is to avoid bigger drops in the price when whales opt to sell their coins later in the game, which prevents the price from changing as much as it would if the automated LP mechanism wasn't in place. All of this is in an attempt to address some of the issues with the existing Defi reflection coins. For these reasons, we are sure that system and protocol will triumph over outdated reflection tokens.

STAKING

Seamlessswap works on the Binance platform, which is eco-friendly, working on a proof of stake system. In addition to being the largest crypto exchange by trading volume, Binance offers exemplary staking services. Binance staking ensures users' funds are safe by leveraging effective security measures and providing Secure Asset Fund for Users (SAFU). Our staking method at the time of writing is arguably one of the safest and most eco-friendly methods (for cryptocurrency) to earn passive income. The platform stores all staked coins using a secure wallet and a double-checking system. As more and more people, including institutional investors, realize the cryptocurrency markets lucrativeness, crypto staking is fast becoming a trend of earning passive income by simply holding or locking funds in a wallet. Since staking cryptos requires some technical crypto know-how and damming requirements, Seamlessswap staking platforms come in handy to allow investors, even those without technical knowledge of cryptocurrency, to stake PoS coins and earn rewards. For only a percentage of your staking rewards, the staking platform lends you their technical expertise and validates stakes on your behalf, enabling you to earn passive income. The substantial growth of cryptocurrency staking has seen a boom in staking platforms allowing investors to earn staking rewards seamlessly. If you're thinking of making passive income through staking, then Seamlessswap token is the perfect option.

BENEFITS OF STAKING

Sovereign system

A decentralized global currency complete with an efficient infrastructure.

SECURITY

It has inherent security, which is essential to maintaining the integrity of a ledger.

FAST TRANSACTION APP

It has high speed transaction rate than others that makes him fast and unique than other

LOW TRANSACTION FEES

Seamlesswap runs on BSC which has one very low transaction fees

COMPLETE UNIQUENESS

Seamlesswap is a decentralized token with a charity focus.

PASSIVE INCOME

Stake holders earn incentives by holding and controlling their digital wealth. Passive income for the beneficiary is the reward of staking.

WHY SEAMLESSSWAP?

WEALTH REIMAGINED

We believe in bridging the relationship between what investors need and the distance they're from it. So we've entered the blockchain network to offer better opportunities starting with seamlessswap digital tokens.

IMAGINE POSSIBILITIES

We expand possibilities and challenge the status quo. Tokens that pay dividends and gives you better governance and control. Vote what you think should happen next

LESS RISK, MORE REWARD

It's simple. Seamlessswap tokens pay dividends you want and give options to stake; this means more earnings in your pocket. Additionally, our governance tokens allow community interaction to drive effective changes, make project decisions, and key elements for maximum results

REDEFINING INVESTMENT CULTURE

The traditional way of investing involves detailed analytics, pattern recognition, and constant risk tolerance. Seamlessswap digital removes the need for critical thinking and having to make sophisticated decisions. Instead, we improve upon our ideas with a hybrid approach to innovation.

EXPECT OPPORTUNITY

Long-term thinking is at the center of our core values. Our focus is on building opportunities and innovating possibilities across our investor community. Thinking along the paths of consistency and making better investment products better highlight our commitment to excellence

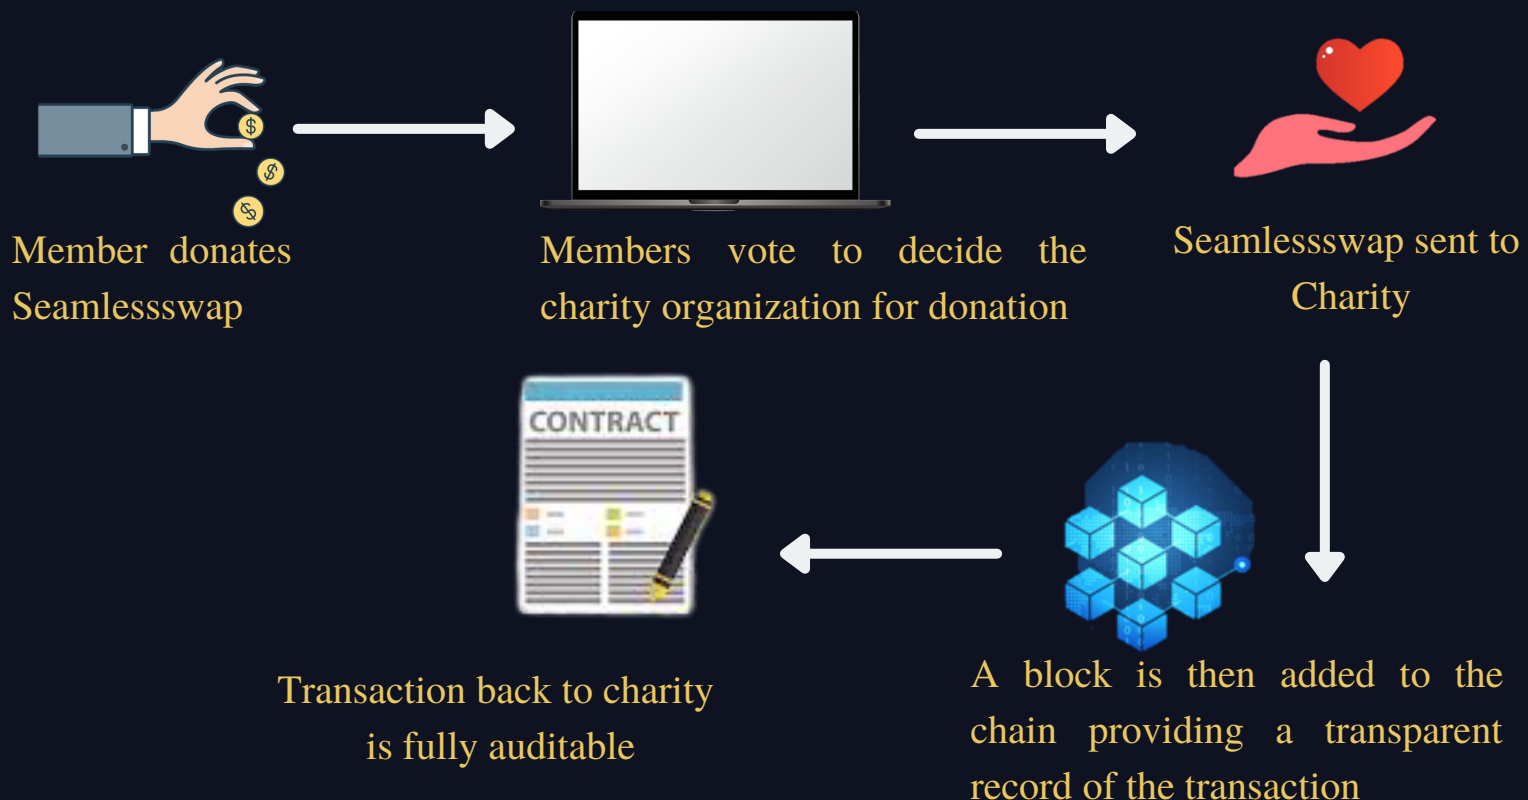

SECURITY

Safety, security, and trustworthiness are our top priorities. The many benefits that blockchain and smart contracts bring make it harder to go back to solutions that often failed. We thrive on the cutting-edge of secured technology solutions

SEAMLESSSWAP CHARITY

Seamlessswap is a ground-breaking new system designed to revolutionize the DeFi space. One of our missions is charitable giving. We encourage our holders to donate to our charity wallet to fulfil our ongoing mission to assist in charitable projects and organizations as well as linked charity organization. Our vision is to donate both token and fiat to the charity of choice to provide ongoing assistance for charitable projects deemed appropriate for support by our community as well as charitable projects picked by our team. We are striving to combat homelessness in local communities along with animal abuse and its habitat rescue. we are also working in collaboration with your votes to decide the new charities in need to donate to, as we want our contributions to be a reflection of what's important to you, our community. By using the blockchain system to donate to charities, our system provides complete transparency toward charitable donations and reflects our community voices. Donations made in fiat will be updated by team members in the appropriate sections for our community to be made aware

How it works?

TOKEN DETAILS

TOKEN NAME SEAMLESSSWAP TOKEN

SYMBOL SEAMLESSSWAP

TOTAL SUPPLY 400,000,000

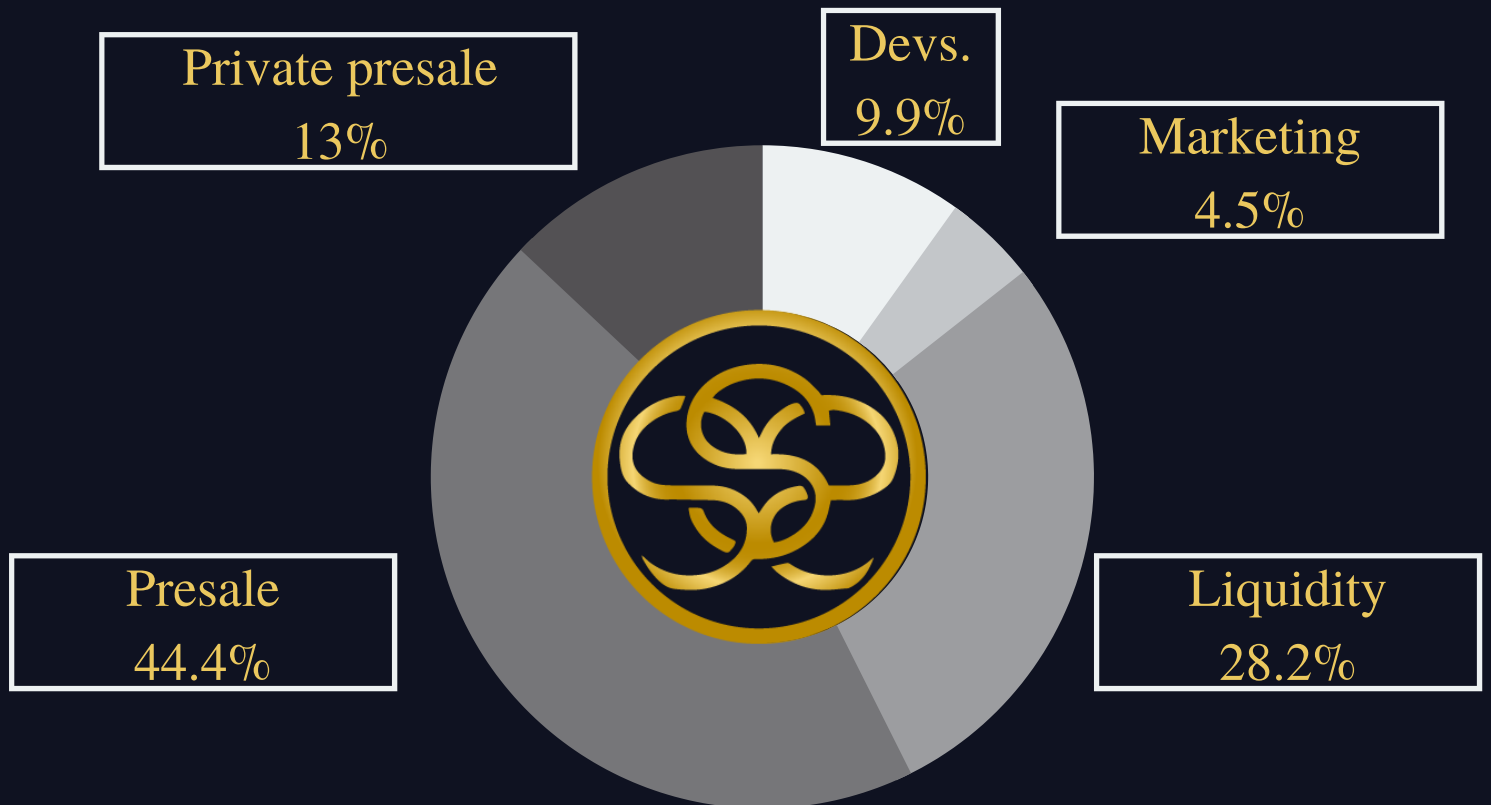

PLATFORM Binance smart chain

BURN RATE 2%

TOKEN DISTRIBUTION

SeamlessSwap is a High rewarding yield farming token on Binance Smart Chain which is distributed on 9.9% devs, 4.5% marketing and 75% Liquidity. Marketing and dev wallets will be used to further on the development and achieve what we want in the road map.

ROADMAP

Q4, 2021

- Start development of launchpad
- Get listed on an exchange have more farms and pools and a complete redesign of the website

Q3, 2021

- Launch token,
- Marketing push,
- List on coin gecko and coin market cap,
- Find potential crypto games partners.

Q1, 2022

- Start development of app with the integrated wallet to make the easiest crypto on the Defi marketplace marketing push
- List on more exchanges
- Launching of the launchpad

Q2, 2022

- Beta launch of the app seamless Defi wallet on android and iOS
- Start development of a centralized exchange
- Seamless exchange Look for major crypto partnerships and
- Exchange listings.
