

# SOLOMON

Your gateway to the world of crypto finance

White Paper

NOV 2020 Version 6.1

## What is SOLOMON?

SOLOMON is unique style in Crypto industry. This new currency, with the abbreviated form of **SLN**, is the unique budding stable coin. It is the exclusive stable coin with sustainable growth rate. While it's completely supported by cash backup, its positive fluctuation is guaranteed. How?

We offer at pre-sale stage solely 1 million tokens and we guarantee to purchase back at the sold price anytime even right after your purchase. The rest will be kept as strategic reserve with high security measures. Our second limited sale will occur only when the price rises to a certain level on public market and based on that. As this is a money preserved crypto, all investments for running it has been paid extra. So, it neither has been nor will be distributed among team members or spent for any means.

SOLOMON offers new generation of Crypto services to simplify commercial payments. SOLOMON is Digital B2B network payment system based on blockchain technology. A great alternative approach to trading in comparison to fiat currency, but we ascertained lack of a system to implement business deals.

This is what we are doing, **this is SOLOMON** - the great digital business solution of the future.

We saw the opportunity in providing trade finance services in crypto-world, so absolutely assure businesses that there will be a systematic performance bond, in which all contract details will be performed precisely in exchange with Crypto. You can use SOLOMON to exchange money and product. By advantaging of latest blockchain-based technologies.

SOLOMON platform is fully clear and accountable to its users. Also ensures that B2B transactions are always safe and secure. SOLOMON offers two main benefits in crypto services for B2B market: **trust and speed**.

**The currency of the future is here.**

Spend **SOLOMON** everywhere, every day, in every possible way.

Furthermore, you can provide your own services and goods to customers using a non-volatile cryptocurrency, as well as to minimize all temporary and operating expenses without involving traditional financial institutions.

We offer a proven, enterprise-grade suite of services and solutions that enables financial services and crypto banking organizations to:

- Securely connect with all of their B2B clients and partners, building and simplifying communications—regardless of size, geography or technical sophistication
- Simplify trading partner onboarding and management processes
- Reduce complexity of systems required to support B2B processes
- Improve security, governance, and compliance
- Gain end-to-end, real-time operational and business visibility
- Leverage new transformative technologies such as Blockchain, 7/24 global payments processing and partner ecosystems

## SOLOMON (SLN) Token

A SLN Token is an ERC20 token developed on the Ethereum platform. This is the main reason why the SOLOMON Platform is developed on the Ethereum which can be flexibly used to provide a variety of services that can be applied directly in real life on FinTech. SOLOMON currency can be sent, spent, saved, or traded through the blockchain. Moreover, it can be stored in any compatible ERC20 wallet (i.e MEW, Metamask, Ledger...).

## Token Sale

SLN tokens will be distributed as follows:

## Use of Funds

## Vision

Our long-term vision is to establish your crypto based bank. A banking model that creates an environment that is more open, accessible and beneficial for everyone. SOLOMON Bank enables you to earn, pay and trade in any crypto as well as fiat-currency worldwide.

The vision of the SOLOMON is to establish a banking model that creates an environment that is more open, accessible and beneficial for everyone.

SOLOMON enables bank customers to pay in any cryptocurrency worldwide as long as they have any digital money on their SOLOMON Wallet.

The SOLOMON project will create a cryptocurrency bank which will deliver the full range of traditional banking services using cryptocurrency.

## Goal

SOLOMON has the goal to become the gateway between traditional and new financial paradigms and systems. Spend SOLOMON everywhere, every day, in every possible way. Spending SOLOMON in everyday life will be exactly like using fiat money, you will feel no difference.

We here at SOLOMON believe that people should be able to manage their own finances without a bank dictating to them about what they can and can't do with their own money. We offer such a way with our secure high yield crypto account.

## Our Customers

Despite the modern approach, customers of the project are still people and businesses serviced by banks. Special favorable accounts and alternatives for leveraging their assets will be on offer for each segment of customers.

SOLOMON services will be available to all, but these services will be particularly useful for:

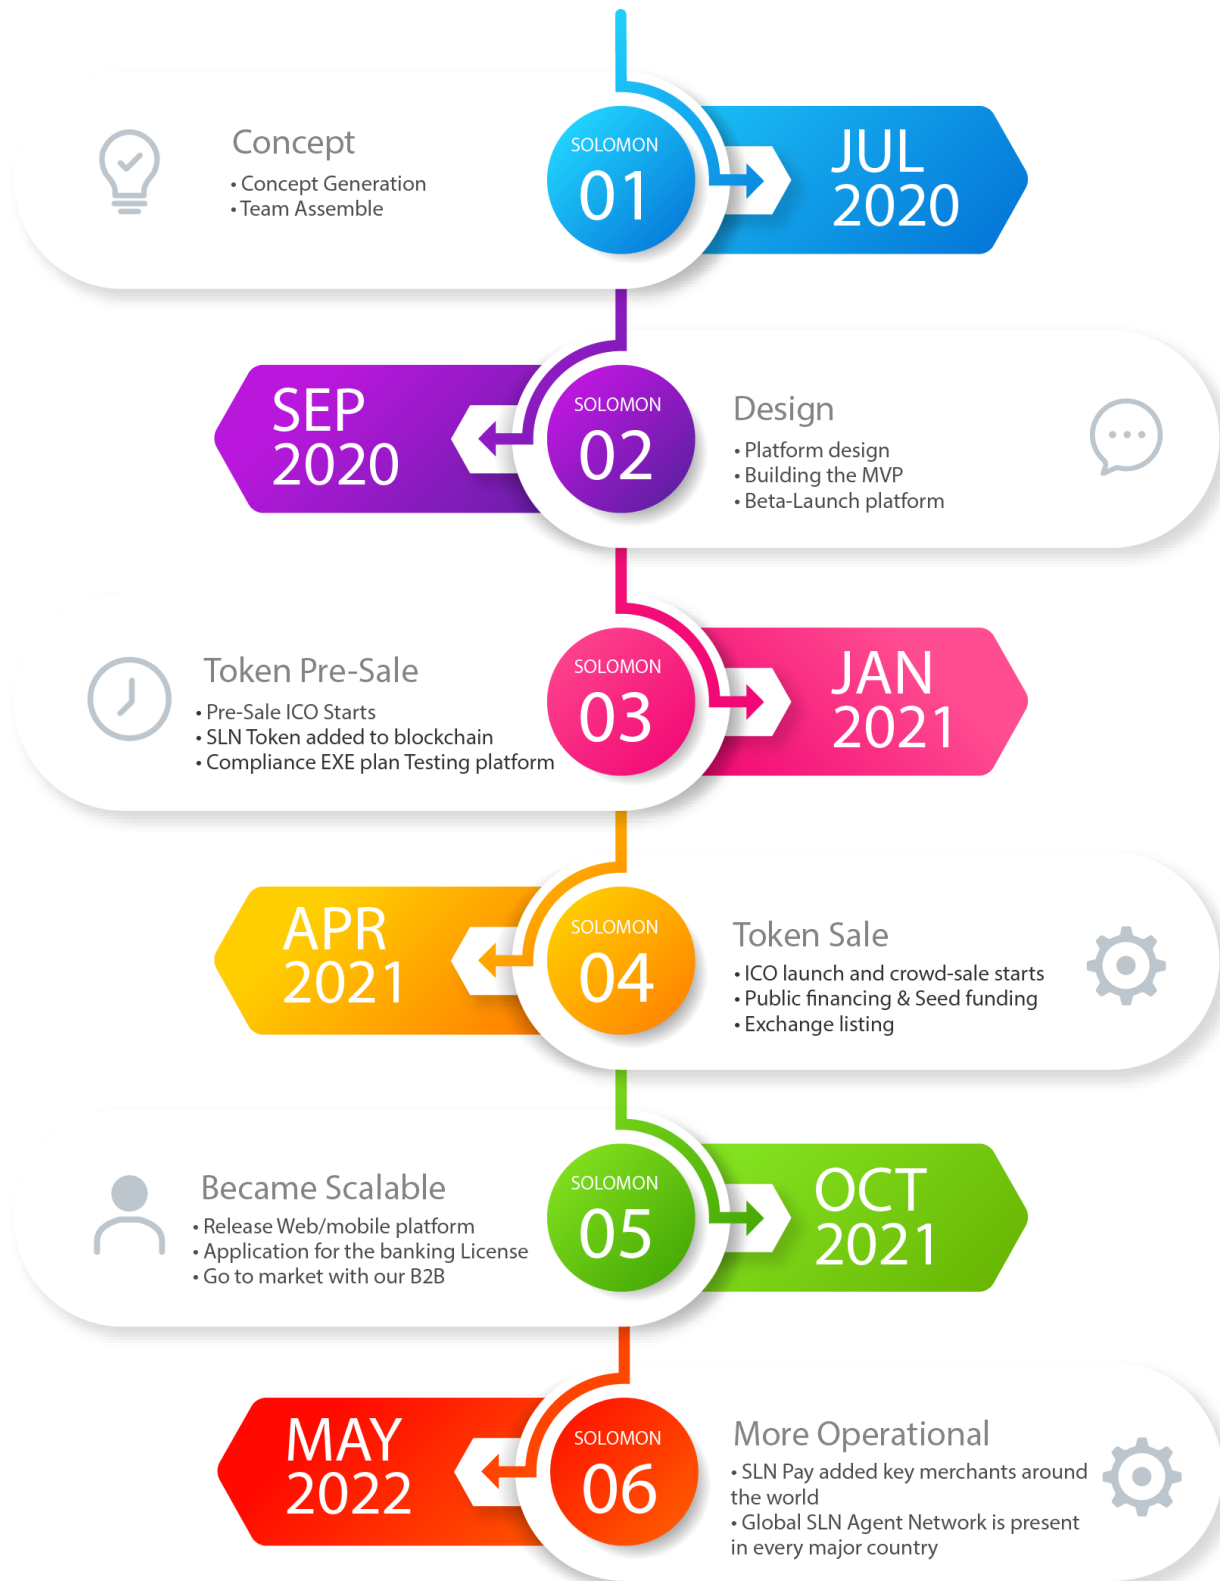

- Business that wants to integrate a cryptocurrency economy in company and conduct B2B transactions with cryptocurrency.
- Customers who simply want to use their own or our cryptocurrency for day-to-day needs.
- Business and private individuals who want to legalize their digital assets.

## Key features

- Fast transactions
- Full account management
- guarantee to purchase back at the sold price anytime even right after your purchase
- Decentralized P2P Trading (Distributed sharing directly between users)
- Multicurrency payments (Payment with exchange)
- High security thanks to cryptography
- Cross-platform (You can use the account from any device)
- 24/7 tech support

## Road Map
