SYNOPSIS

TradBit is erc20 standard smart contract token build on ethereum blockchain on solidity. that is business, investment & of course trading friendly, catering exclusively to the need of investors & traders in the fields of technology and decentralization . with TradBit, you feel amazing trading experience like never before .

TradBit is created with the intention to facilitate investors & traders for performance of a best profits/trading experience.

we planned to create a token focused on the Traders/investor.

For provide our investors an insurance, we decided to choose a stable coin like "USDT" but we found our token will grow like others do at the time of beginning. it takes a long time to grow a project and it's natural, most of the time.

Then we decided to skip this long waiting part and deploy "TBT" insurance rate based on the "Ethereum".

we are gonna take both (ETH & TBT) advantage the the same investment time.

when you invest in TBT, othere side we let you enter the ethereum because of our min. rate insurance on ethereum. and TBT rate not gonna down below 0.001 ETH. (And this rate will increase with time for sure :)

USE CASE

"At the present time the highest use case of all crypto-currency is Trading". and we love to work with it. So, TradBit is a trading token and our priority for the beginning of our project is and will be trading. according to us The trading platform has a lot of potential and after complete to adding it to well known exchanges and ensure for it's regular volume we'll go for the next action for adding it to direct use case for goods.

After all TradBit is a decentralized crypto currency, it can be use as a currency in crypto and related platforms anytime without any third party approval .

We want people to feel safe with our token and we want to be here for the long term, that is why we have created a safe Trading focused model that will be a secure and profitable for you.

BASE LINE AND BURNING

VALUE INSURANCE :

If only ETH move TBT automatically grow, if anyhow ETH not moving as expected, there is nothing to worry about TBT, our team and marketing are fully independent. we are doing & will our best for TBT future. here is a simple blueprint of our strategy for TBT :

- 1. When ETH start mooning again ,TBT will get direct effected.***
- 2. If ETH not moving, TBT also work great with burning and base line strategy.***
- 3. And when ETH and TBT both start growing, the best moment come for dual moon .***
- 4. TradBit has fixed and small number of token which will become more valuable with time.***

BURNING :

Burning digital assets direct effect & help circulation assets to rate to up . it's natural with any assets or goods . burning assets by sending them to burning address is a great feature in crypto and we are gonna use it .

Now,TBT is new in crypto space ,there is always market manipulation exist on exchanges. our second main strategy is to burn all tokens founded below eth base line. when we find below line selling tokens, we are not gonna reuse it, direct send to burning address and publish it to social platform with community. weekly monitoring is playing big role to burning .

TOKEN INFO AND SHARE :

Token Name : TradBit (TBT)

Total supply : 21,000,000

Decimals : 0

Contract address :

0xfad4df6f4e5aa55e80586351b87185678bb01a13

Burning address :

0x00

1st public sale : 0.0015 ether = 1 TBT

LOCKED 50%

(0xB6C790Edd5c51f81772058bfaF33304a28a59139)

50% of all supply will be locked till future development.

PUBLIC SELL 30%

(0xa7e100775392650105DeBBf58Cc32673D75eb3D9)

this amount will be use as public sell to maintain developments & insure the insurance .

AIRDROP AND BOUNTY 10%

(0xA38866bf63B964fd5869B9165Fb6D9555954A73B)

10% is using to promote the activeness of community & attract new investors/traders.

ADVERTISING AND PROMOTION 9%

(0x8fF4a801aadDDcF9176D4E14D8Bf7B1C12Ee1B73)

9% will be use for TradBit advertising and promotion.

WELCOME SELL 1%

(0x44861a56eFE3455332B4B51c811389C9AE6f0752)

welcome sell to say thanks to our community , rate will be low than public sell .

ROADMAP
