The Vikingschain tokenomics has been carefully designed to ensure that players get to maximize and earn rewards.

Core team has given full commitments by locking their tokens for 1 year

Smart contract would be audited accordingly to ensure the highest safety

Partnerships with IDO launchpads to maximize strategic and marketing partnerships

4. TEAM EXPERIENCE

With a diverse of over 10 years, some of our members' working experience with companies and gaming project includes:

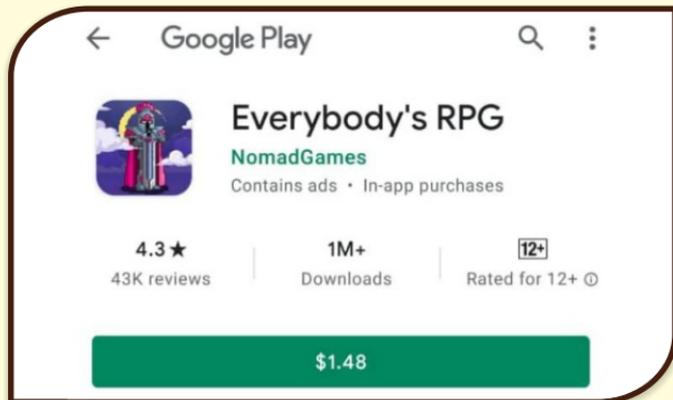

-Everybody's RPG (1 Million+ downloads)

<https://play.google.com/store/apps/details?id=com.nomadgames.everybodyrpgpay&hl=en>

- IBM
- Binance Angel
- BidaoChain

Our team of gaming developers have also achieved great milestones in the gaming Industry, which are:

- 10 years of gaming development experience
- 20+ Games developed (2D/3D, AR/VR)
- 100,000+ Gamers engaged

4.1 TEAM VIKINGSCHAIN

TEAM VIKINGSCHAIN

Team of passionate experts having a common passion in disrupting the Blockchain Gaming Space.

JAMES C.K.

CTO, Co-Founder

With over 7 years of project management in the game development space, C.K. is a strong believer in the gaming blockchain Ecosystem. Expertise's include PHP, python, C++ , Solidity and LAMP stack with AWS using EC2, EBS and Amazon RDS.

MJ JAVIER

Game Designer Lead

Graduated in 2D/3D Gaming Animations with Visual effects, MJ has worked on numerous projects in the gaming ecosystem, contributing to VikingsChain as our lead designer.

DANIEL SLUP

Game Developer Lead

Graduated with a degree in Software Engineering, Daniel has 7 years of expertise's in game development and has successfully developed over 20+ games which includes the popular game "Everybody's RPG" with over one million downloads. Expertise's include AR, Web & Mobile Applications.

DIMA LA.

Blockchain Game Developer Lead

Graduated with a Master in Computer Applications, Dima has 5 years of deep expertise in the Unity Game Development. His area of technical expertise's include Firebase(Backend), Flutter, Node.js, 2D and 3D game Development with VR functions.

5. TECHNOLOGY

5.1 UNITY EXPERTISE

- With over 10 years of gaming development experience, this game will be built using unity software.
- Unity competitive advantages include:
 - high quality and next-level visual and rendering effects
 - multi platform with supportive community
 - scripting languages with intuitive tools
 - ability to create 2D/3D games in multiplayer modes

5.2 BINANCE SMART CHAIN

- **VikingsChain** will be utilizing the Binance Smart Chain (BSC) Technology as part of their blockchain contract and NFT developments.
- BSC's strength includes:
 - Cheap transaction fees as low as 1 cent
 - High performance with a network capable of producing a block every 3 seconds
