Risk Management

6 of Risk Management

There are 6 basic types of risks that may arise as a result of selecting Tokenization as a fundraising mechanism.

1) Operational Risks, including Cyber Security risks:

2) Financial Risks, including losing your investment:

3) Reputational Risks:

4) Regulatory Risks:

5) Bitcoin (BTC) mining-reward halving, based on the way the cryptocurrency's options are valued. Halving is not always bullish.

6) Or On 11 February 2020, WHO announced a name for the new coronavirus disease: COVID-19.

How to become a successful

WHY GenieCoin?

GenieCoin on Ethereum's platform for the future of crypto-token that empowering data for the new equity blockchain. GenieCoin for almost any purpose. Add-on Dapp and interactive behavior to add on function. By creating an action, you define what happens when the user selects function of token.

In most cases you can define add-on actions using Action objects provided by the Application new service payment with GenieCoin's Token. Each Application of ecosystem services to increase GenieCoin's value. With a new function when you to use you must pay service of it very low costs per a use on blockchain payment . GenieCoin add on function game,music, qrcode,design,avatar,co2,barter,element social pros, djmix etc.
We provide investors with exceptional investment opportunities in a variety of industries.

BlockChain Gaming

Blockchain gaming

For my blockchain gaming, like most blockchain solutions, needs to be examined on its merits and picked apart on its flaws before it can be decided if it is the future of the space. The growth of the blockchain gaming market also needs to be weighed on its potential to integrate, as well as overcome traditional hurdles.

Claim your Free GenieCoin

By Free GenieCoin with to enroll your SME-project.

Music Streaming

It's Blockchain-based Music Streaming Platforms. Let's face it; music streaming is huge right now — it's basically the 21st-century vinyl. In fact, today's traditional streaming services like youtube apple music and spotify have become cash cows for the music industry. Of course, this is a good thing in the sense that people all around the world will begin to see on-demand audio streaming as the future of music consumption. Moreover, the overall ease of streaming music implies that more music lovers will keep listening to their favorite tunes in the years to come on blockchain technology.

Barter And Negotiating

Barter and Negotiating.

GenieCoin's Token to barter any thing you want by going on bartering is the trading of one product or service for another. Usually there is no exchange of cash just start negotiating.

How It Works Bartering occurs when two or more parties – such as individuals, businesses and nations – exchange goods or services evenly without the use of a monetary medium. While a barter economy is considered more primitive than modern economies, barter transactions still regularly transpire in the marketplace by the way GenieCoin's Barter on Blockchain.

" To Start GenieCoin'S BARTER and negotiating" GenieCoin TOKEN base on Ethereum blockchain technology has the potential to dramatically raise efficiency in a range of business tasks, from supply chain management and securely sharing data to tokenization of real-world DIGITAL ASSETS.

Besed On Fully Decentralized

Ethereum is a Blockchain token platform that allows the creation transfer and exchange of custom and fiat tokens and assets through the Blockchain without volatility. The Ethereum liteclient will feature a Portfolio, voting area to facilitate consensus on various projects and a messaging center. Based on new generation coin technology, Ethereum is a global, open-source platform for decentralized applications.

On Ethereum, you can write code that controls digital value, runs exactly as programmed, and is accessible anywhere in the world. was built from scratch to provide new features. Ethereum platform is an independent and opensource blockchain platform that allows its users to build applications, create and distribute new cryptocurrencies. Ethereum was founded by Physicist, published in 2013 by Vitalik Buterin. Today, Ethereum is believed to be one of the fastest Blockchains and continues to serve as a transparent, fully decentralized and auditable platform for value transfer. Ethereum Platform heavily relies on fiat gateways administered by independent operators. These operators enable users to exchange fiat currencies for digital coins. However, the coins here are different from the usual ones you know, such as Bitcoin and Ethereum. Fiat currencies like USD or EURO are converted to fiat tokens and can now be transferred through Blockchain. Anyone can run the API Ethereum's node software to work with and check the Ethereum blockchain for correctness. The software has some functions available for creating and broadcasting transaction to the network. People can use any hosted node if this node has an open API port. On the Ethereum platform, any token can be exchanged with any other token or Ethereum by creating and matching exchange orders. The Ethereum platform provides "Smart Accounts" and "Smart Assets". These are scripted securities which can be attached to an account or token.
