

CRYPTO CHIP TOKEN (BVC) WHITEPAPER

ABOUT US

- We have been dealing with the crypto market for a long time, due to the decentralization we think it will have a crucial part in the future. As an IT company there is no choice but to move on with the age and integrate new things into the everyday life. This is also our motto: Bevachip Kft. is a partner in progress.
- Working in the field of online commerce for 25 years we want to take up the challenges and opportunities of modern technology to enhance our operations while giving consumers a much better feasibility to choose from the best vendor in any field they desire.
- Cooperation is important both in business life, so we give Hungary's most popular Token as a reward, namely the HUNGARIAN VIZSLA INU Token, because we know how reliable their project is so our holders can benefit from both project's success.

- To be announced.

CRYPTO CHIP GOALS

- We feel that we can give more than the competition and we know that satisfied customers are interested in loyalty programs. We would like to switch the current loyalty discount methods into a loyalty program, for which the BVC Token is essential.
- Our goal is to be accepted by other web stores as well, because BVC is even transferable and doesn't expire, like most gift vouchers that aren't redeemed anyway, in fact if they don't be redeemed for a long time, their value can increase.
- Also we want to connect online buyers with companies through the crypto space by emerging a loyalty program that will benefit both sides by making a bridge between them with the pillars made from BVC.

CRYPTO CHIP TOKENOMICS

Every transactions has an automatic 12% transaction tax:

- 5% Automatic LP acquisition (1% Team Wallet, 2% Marketing, 2% LP Pool)
- 5% Rewards (HVI Token) for holders
- 2% Development

At the start:

- 65% Coins for Sale (Liquidity)
- 5% Development
- 10% Team & Marketing
- 20% Treasury Wallet

REWARD

- Cooperation and partnerships are important, so we give Hungary's most popular Token as a reward, namely the HUNGARIAN VIZSLA INU Token.
- With each transaction 5% of the value is distributed to existing holders in HVI Token. Minimum 100,000 BVC Token Holders.
- HVI Tokens stored in the treasury serve as an extra reward for strengthening the community. Examples: Promotions, contests, airdrops, content making etc.

TREASURY

- A treasury wallet is used to provide security even in harsh times. This is crypto, we are prepared.
- 20% of Tokens will be set aside in this wallet to replace stolen, lost and blocked tokens.
- With HVI Tokens received as Rewards also to this wallet it could also be used to fund ongoing promotions, prizes and tournaments.
- In the event of a large depreciation, the BVC Token can also be used for acquisitions, which ensures an increase in the exchange rate.

LIQUIDITY POOL

- Part of the core logic of the BVC Token contract is an automatic liquidity pool algorithm. 2% of each buy and sell is accumulated and then added to the PancakeSwap liquidity pool.
- One of the core aim is to reduce the price impact when larger wallets decide to sell their tokens at any point in time.
- Having this algorithm in place, in theory, it helps to reduce the large price fluctuations that can be seen in other tokens, when the project becomes larger.
- In short, the tokens and BNB added to the liquidity pool creates stability and an increased price floor.
