At the moment the players are sold to other clubs, the profit collected will be used to buy passes from new players from lower divisions. In this way, a ascending circle will be created where the profits made by the sold players will allow the purchase of new ones and so on.

The youngsters that once were acquired and accompanied in their development by Futbol Coin (FUCO), with their sale, will allow the purchase of new promises.

A percentage of the purchase will be destined for the player and another for the club, helping clubs and players.

## Accumulative players' circle

Each time the cycle is completed, Futbol Coin (FUCO) will increase the number of player passes and will be able to help more young talents by accumulating more and more earnings that will be reintegrated into the proposed mode.

## **Exclusive soccer betting page**

Futbol Coin (FUCO) will create a sports betting page exclusively for soccer where our token will be used to place the bets, increasing the value and utility of the currency.
