# Marketing Strategy

- ▶ Embedded with a great technical system and a smart contract, providing the investors with the best seats in an auto-liquidity, buyback, and burn assets, Wukong Finance is paving the way for smart and simple projects to rise in the market. The motto is to: Fight together, Moon together. Our purpose is to build a wealth distribution system that profits the greatest amount of people possible while providing a project that delivers high rates of rewards.
- ▶ Our marketing plan consists of 4 main focuses: engaging the community in a more interactive approach by hosting competitions.
- ▶ We have also been getting positive results from our paid ads in PooCoin, BSCscan, Coinmooner, and many others, thus making "value investment" one of our priorities and steps in our marketing strategy. Yet, all this doesn't seem enough, unless there is a consistent flow of communication between the investors and the developers, so we opted for getting a whole team in charge of all the communication in and out of the project, to be as responsive, helpful and fruitful for you
