and autonomy.

Buying and selling
products in an
encrypted form.

Transfers between
users.

High valuation.

Staking: quarterly
earnings.

SAFETY

blockchain encryption system
ETHERSCAN, the safest on the market

PLAN

BURNED COIN

**One of the most
Market Aggressives**

For each transaction carried out with XGC, 2% of this amount is withdrawn from the COIN RESERVE, then BURNED!

During 7 years, every 4 months, 9 TRILLION XGC will be burned from the COIN RESERVE, totaling a burn of **90%** of supply in this period!

Decreasing the supply of currencies on the market generates a constant currency appreciation.

1st BURNING - 28/08/2021
