

WHITEPAPER

HEDGE ROCKET

V1.1

ABSTRACT

The shining horizon of passive income from investments became very clear after decentralized financing was introduced in the cryptocurrency market. Everyone wanted to multiply their financial resources through investment in decentralized financing. Then, the hedge funds came in front of the cryptocurrency market to make passive income possible. Everyone who wanted to become an investor in cryptocurrency could never become a successful investor on their own, so the concept of decentralized financing was introduced, where the managers of these hedge funds became billionaires while the investors could not enjoy the real benefits due to them. The managers of other hedge funds managed the investment; these managers got the actual benefits. However, the expert team of Hedge Rocket wants to fill in this blank and democratically make crypto investments through a voting platform that runs on Difi Network.

LEGAL DISCLAIMER

The Hedge Rocket, or " Hedge Rocket " is a crypto asset that is currently being developed by Digital exchange limited and it's AI blockchain community. The website for Hedge Rocket can be found at <https://hedgerocket.finance/>. The Securities and Exchange Commission (SEC) has qualified the offering statement that we have filed with the SEC under Regulation A for our offering of certain of our Hedge Rocket. The information in that offering statement is more complete than the information we are providing now and could differ in important ways. You must read the documents filed before investing. The offering is being made only by means of its offering statement. This document shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of these securities in any state or jurisdiction in which such offer, solicitation, or sale would be unlawful prior to registration or qualification under the securities laws of any such state or jurisdiction. An indication of interest involves no obligation or commitment of any kind. Any person interested in investing in any offering of Hedge Rocket should review our disclosures and the publicly filed offering statement and the final offering circular that is part of that offering statement here. Universe Finance is not registered, licensed, or supervised as a broker-dealer or investment adviser by the SEC.

INTRODUCTION

Hedge Rocket is the only DeFi project with a plan to generate income for Token holders and the power to move markets, because until now, it has been possible to run investment funds only with government rules while only greedy managers get the maximum benefits through the investments of others. The Hedge Rocket project will change this.

This is a typical project that has a separate legal and procedural entity, in which the investors will participate by buying Hedge Rocket Tokens and then creating a pool of funds, including a mandate that will dictate what kind of assets will be invested. All the decisions will be made democratically by the token holders, and the project's managers will honestly implement these democratic decisions in investing. This way, everyone will get the advantages of being in a financial position, and investments will go sky-high at rocket speed.

Hedge Rocket wanted to finish the magician's role of the managers of hedge funds over the investments of the users. This project's financial team has killed the mythical presence of the managers so that all of the investors may participate in investing on a different blockchain. In the past, big-money players set up those hedge funds but avoided all the types of regulations that they kept on doling out to the poor investors in their project. They also kept harvesting billions of dollars by monopolizing the skillful and clever utilization of the pool. Hedge Rocket has discontinued this concept of the managers and that of monopoly over the investors' money. In fact, it has given the users of the hedge fund maximum freedom, enabling them to be their own investors and to reap the best financial benefits from the fund.

WHY WE LAUNCHED HEDGE ROCKET

We had launched this project because in the traditional hedge fund projects, to prevent a different type of fraud, a custodian bank was established. When an investor bought the shares, they essentially handed over the control of their assets to the bank, and then the managers managed all the investors' investments, which has been a problem for all the investors of the decentralized financing.

We have launched the project of hedge Rocket because the administration costs in the proper valuation of funds were sky high and the external auditor the administration of each quarter used to charge at a very high level and due to this problem we thought to present a project with fewer administration costs.

There was also a problem with third-party. The third-party element has been finished in the products of decentralized financing, but unfortunately, practically, this could never be completed, and third-party kept on getting their benefits from the investments of the investors. We have tried to end the concept of third-party interference in Hedge Rocket.

We have launched this project because the cost of starting up the businesses was so much that the investors of the ordinary level could not think of becoming a token holder in the near past time. The holder of thousands of dollars could ever imagine becoming the investor of the Hedge funds.

HEDGE ROCKET SOLUTION\

Hedge Rocket is a decentralized asset management protocol, and it will allow anyone to buy and invest in Stocks, crypto and NFTs. The layers of bureaucracy to run a traditional Hedge fund are not necessary for the Hedge Rocketd protocols. With Hedge Rocket protocol, the investors will quickly and easily buy the Hedge Rocket token receive 2.5 % on every transaction. The other 5% of the transaction will go to liquidity and the investment pool. All the profits in the investment pool will go back to coin holders in the form of hedge rocket tokens. The community will decide all of this through the DiFi Voting platform.

REPLACEMENT OF ADMINS BY SMART CONTRACTS

We are here to provide that type of platform for fund managers and investors to operate in a typical way that is secure, transparent, efficient, and dramatically less costly. We will replace the majority of admin tasks with smart contracts, and it will reduce the cost of setting up and running a transparent, audited, and fully compliant fund on the blockchain.

We have set smart contracts on Hedge Rocket to perform specific functions which are found in traditional hedge funds like:

- Trading
- Fee Distributions
- Asset Custody
- Accounting
- Investment
- Democratic Elements of Hedge Rocket Following decisions will be made through
- voting
- Taxes
- Fees

Liquidity

The Hedge Rocket Tokens

The Hedge Rocket Gas Fee

It is an admitted fact that on the Ethereum blockchain, the gas fee is collected on transactions, but the protocol of Hedge rocket will collect a fee on each trasnation

2.5 % holders back to holders

2.5 % to the pool that's locked for a year

5% fee split 50/50 - Half sold to BNB and half added as a liquidity pair

FUTURE OF HEDGE ROCKET

It has been designed for the users to manage their investment and wealth and the wealth and investment of the others in a democratic way. It has been collected at a meager cost with the lowest start-up time, so now it will certainly have a future that will be seen in the stars of Defi.

When it renders outstanding benefits to the newcomers because it is easy to be used when it also causes maximum services in a democratic way to all the investors, surely the demand of this token will rise, and when its demand will increase automatically, its value will increase, and one day it will have that place where others will yearn.

TOKEN DISTRIBUTION

HERE IS THE CONTRACT ADDRESS:

0X123870DCDD142948DFF44906E4509020A80A5EC6

ROADMAP

Q1

Token Creation

We have successfully created our token contract, as well as our social media sites (Telegram, Twitter, Instagram, Discord, Reddit). We are in the process of being whitelisted on Trustwallet. We are conducting the legal paperwork to onboard on various other exchanges including BitMart. We are conducting the legal paperwork to be listed on CoinMarketCap and CoinGecko. We commenced the marketing campaign and expanded our team.

Q2

Massive marketing push. Website redesign with over 100 different languages. Creating our community-driven DeFi voting platform along with the Hedge Rocket App and Wallet. Vote in the marketing team. All voters will be verified with their holdings of the coin. After our voting system is created will be onboarding a team to execute our investment projects. After our team is voted in from the community we will begin architecting the NFT exchange. Our goal is to invest and hold NFTs in our community holding account. All NFTs that are purchased and sold will be voted in by the community. The community will own the largest NFT collection on earth.

Q4

We will finish and launch Hedge Rocket Exchange. All profits from the exchange will be redistributed to coin holders and put back into the community investment fund. We will continue to research new ways to invest and grow Hedge Rocket to the biggest community-driven fund on earth.

Q3

The investment pool is unlocked. We will start researching stocks and crypts to buy, sell, hold and short. In addition to setting up the investment fund. We will be exploring other exchanges (i.e. Binance) and begin architecting the Hedge Rocket Exchange. We will be expanding the team by 50% and establish offices in Europe and Singapore and let the community decide on. Other locations with our voting system.

CONCLUSION

The founders of this token are focused on automating the way traditional asset Management has always been performed, and they will perform the functions of hedge funds in a democratic way. They are happily saying goodbye to the countless financial intermediaries. They are going to say goodbye to the multiple points of failure for the newcomers. They are also going to say goodbye to the admin costs and various regulations in hedge funds. In short, they are going to say goodbye to the high barriers of entry of hedge. In short, it will undoubtedly be the dawn of the new era, and it will say bye to all the harmful elements of hedge funds, and it will usher in a new generation of Defi with new Defi protocols of Hedge Rocket.
