

# What's UpDog?

## UPDOG IS A HIGHLY DEFLATIONARY, HIGH REWARDS TOKEN WITH A CHARITABLE TWIST.

Here at UpDog, we are strong believers in the **DeFi** ecosystem and want to reward participants as much as we can. We are also strong believers in helping dogs who are down on their luck. This is why we use an **auto-staking, deflationary** token model as well as milestones which will automatically trigger **donations** to dog shelters and charities.

### IN IT FOR THE DOGS

Dogs are a man's best friend. UpDog is returning this favour in a big way!

Not all dogs are fortunate enough to live happy and healthy lives. Thankfully, many fantastic initiatives worldwide aim to improve the lives of these four-legged friends. UpDog rewards its holders and shares its success with various charities that can use our support.

For every milestone achieved in valuation, we will make donations to different charities. We are proud to announce that we reached the first three milestones already!
