EXONOVA PROTOCOL

WHITEPAPER

WHO WE ARE?

Born within the darkness of space, a new gem was given light. Exonova Protocol is the birth of something great. A community driven token within the wild west of crypto, making passive income as simple as possible. We have taken extra time and care to provide the right token for our community. Our aim is to provide a safe haven for our investors and make it the forefront of what we do.

We are building a multi-project ecosystem that works on any device, connecting everything through the internet. Exonova Protocol, is the first of three tokens launching in our Multi-project ecosystem, Each project/Token to be launched by Team EON will have its own unique infrastructure and function.

Behind Exonova, there are 3 main core members and 4 secondary line team members from all over the globe, ensuring there is **always** progress being made within our ecosystem.

This isn't our first rodeo, a collective of 15+ years within the team & with many of the members being behind and managing some major projects within the crypto space. We're an experienced team that has the drive and determination to continue to bring Exonovas' ecosystem to new heights and make it succeed.

We are always looking for new members for our team. People that can bring new and exciting ideas to the table & make our ecosystem thrive with new life.

Our vision

Exonova is just the front door into our multi-project ecosystem. There will be 3 major projects within our ecosystem. Sector launch Q1 2022 & ARK launch Q4 2022 each with their own unique function & utility.

Exonova's vision is simple, to bring an easier way to put your passive income on auto-pilot. With a 8% reflection with BUSD stable coin and a 5% transaction fee awarded for LP acquisition to create an everlasting supply for trading.

We want to make holding Exonova tokens a good thing, so we are rewarding our holders with BUSD. We want to incentivise our investors to stay with us, whilst we smash new milestones and continue to grow our ecosystem into a thriving community.

We have many hidden milestones within our ecosystem that we will be implementing at key points in our journey. Each milestone will see different infrastructural developments being released to our community, you will have to stick around to see.

We intend to keep our holders included with decision-making throughout the life of NOVA, from future growth, charitable donations, influencing partnerships and further suggestions from our holders.

Smart contract

Best Practices

❖ Owner cannot stop or pause the smart contract.

❖ Owner cannot lock or burn the user's assets.

❖ Owner cannot mint tokens after initial contract creation/deployment.

❖ The smart contract utilizes "SafeMath" function to avoid

common smart contract vulnerabilities.

```solidity
string private _name = "Exonova";

library SafeMath {
function add(uint256 a, uint256 b) internal pure returns (uint256) {
uint256 c = a + b;
require(c >= a, "SafeMath: addition overflow");

function sub(uint256 a, uint256 b) internal pure returns (uint256) {
return sub(a, b, "SafeMath: subtraction overflow");

uint256 c = a * b;
require(c / a == b, "SafeMath: multiplication overflow");

return c;

function div(uint256 a, uint256 b) internal pure returns (uint256) {
return div(a, b, "SafeMath: division by zero");

function mod(uint256 a, uint256 b) internal pure returns (uint256) {
return mod(a, b, "SafeMath: modulo by zero");
```

Warning

❖ Active smart contract owner: 0xb2c4954f80ada033617a4074ce71d65a015bac8

 ❖ ***Be aware that active smart contract owner privileges constitute an elevated impact to smart contract's safety and security.***

❖ Smart contract can ***buyback*** tokens from the total supply.

❖ Smart contract owner can ***change the buy and sell fees***. This function module can be used to impose extraordinary transaction fees. No threshold set.

❖ Smart contract owner can ***change max transaction %***. The smart contract owner can change the value to "zero". No threshold set.

❖ The smart contract has a low ***severity issue*** which may or may not create any functional vulnerability.

Audit GitHub Links:

Tech-Audit:

https://github.com/Tech-Audit/Smart-Contract-Audits/blob/main/TECHAUDIT_EXONOVA.pdf

TechRate Audit:

https://github.com/TechRate/Smart-Contract-Audits/blob/main/December/Exonova%20Full%20Smart%20Contract%20Security%20Audit.pdf

InterFi Audit:

https://github.com/interfinetwork/smart-contract-audits/blob/main/Exonova_Audit Report_InterFi.pdf

Tokenomics:

```
uint256 liquidityFee = 500;
uint256 buybackFee = 100;
uint256 reflectionFee = 800;
uint256 marketingFee = 100;
uint256 totalFee = 1500;
uint256 feeDenominator = 10000;
```

- liquidityFee = 5%
- buybackFee = 1%
- reflectionFee = 8%
- marketingFee = 1%
- totalFee = 15%

< **Owner privileges to watch – BUYBACK, MAX TX LIMIT, CHANGE BUY – SELL FEES** >

Distribution:

- 5% of the total supply will be used for ongoing marketing to help gain aggressive influential partnerships to take the ecosystem to new levels.
- 5% of the total supply will be locked away every month for charitable donations, after every month or when the time-lock is up. We will host a poll and let the community decide which charitable partner we choose.
- 10% of the supply will be for private sales for the core team, influential partners & a selective few of the community. (whitelist)
- 2.4% will be set aside and used for pre-sale.
- 0.48% will be used for our liquidity pair with BNB
- 50% of the total supply was burnt before pre sale launch
- 15% of the total supply will be slowly burnt strategically throughout the first 6 months of NOVA tokens life.

All token locks are provided on our official website exonova.net/Locks

Team wallets:

We want to be as transparent with our community so we have explained and outlined the plans and purposes for each wallet you might be curious about.

Marketing wallet:

At the general platform build phase of our project we planned and agreed to place aside 5% of the total supply to help with marketing plans for our project. We are going to keep the community actively involved in what marketing decisions we make to gain aggressive influential partnerships to help take Exonova to new heights.

We only have access to 3.98% of the wallet 1x every 2 weeks, for us to use to continue marketing.

< 0x9cb6b1044339A0a51f8904A3E72c6befA73B297F >

Charity wallet:

During the Core team build, we all came together and made sure that we set 5% of the total supply aside for our charity wallet. Within the charity even section on our website (desktop view only) there you will find detailed information on our charitable donations. Within that event section there also will be a poll for our community to choose which charitable partner we partner with and donate to. All donations will happen at the end of each month or major milestone to create a bigger reach for our community.

We only access 10% of our charity wallet once a month, for us to donate to the charitable organisation our community chooses.

< 0xF57Bf38AcE3a63b3CEF15C574b76690CDc128982 >

Burn wallet:

15% of the total supply will be burned strategically over the first 6 months of Exonova "NOVA' tokens life.

Roadmap:

General platform launch - Onboard & confirm initial pairs, create most efficient deflationary smart contract. Gather and build core team & Long term vision. Official website & Social media accounts will be created. Create and deploy smart contract on testnet, Initialise verification of smart contract. Token metrics finalisation. Initial contract deployment token pair, create and deploy token smart contract to BSC mainnet. Marketing campaign expansion. Influential partnerships and team expansion.

November 2021
Community networking, website development, private sale & presale announcements. Gain influential partnerships & provide a main basis following for private-sale and presale.

December 2021
NOVA Launch Campaign - Presale & Launch. Smart contract audits. Tokenomics simulations will be integrated and finalised. Full scale NOVA marketing campaign, Further influencing walk through talk throughs & first charitable donation from NOVA in USDT

Q1 2022
Sector smart contract design & website creation. Testnet goes live. Sectors integration with NOVA. Sector fair launch. To create a dual-project ecosystem.

Q2 2022
Gather and build a core team for an official NOVA merchandise store, Full store integration into our project. Duel-project ecosystem in full swing, NOVA will aim to get listed on Major CEX such as Binance etc

Q3 2022
Sector NFT marketplace creation and development and integrate testnet marketplace into Exonova ecosystem. Creation and development of storefront for Exonova merchandise.

Q4 2022

ARK smart contract design & website creation. Testnet goes live. ARK integration with Exonova ecosystem. ARK presale & launch. Finalise the Multi-project ecosystem. Storefront integration into our ecosystem. Sector NFT Marketplace deployment. Final Exonova design & website completion, merch stores test net goes live. Branching from NOVA's main net.

December 2022

First limited merchandise launch, All payment integration will be made with NOVA, USDT & BNB. With purchases using NOVA, it will be used as a community buy back for burn. Christmas & New years giveaways.

2023

Storefront revamp & second merchandise launch. community NOVA payment buyback will be burnt before (second merchandise launch). Continue to push wide on platforms and other DEX & CEX to provide a bigger bases and foundations. Open a wider store front end for other projects to host their merchandise for public sale amongst our communities.

2024-2025

Fund creation and development of NFT & Merch Dapp platform. Creation and development of Dapp. Build Dapp Core team. Blue-print development of Exonova "EON" protocol Blockchain, Brainstorm & fund first line creation and structure of Exonova "EON" Protocol Blockchain.

2025-2027

General Exonova "EON" protocol Blockchain platform launch - Onboard & confirm initial pairs, Build core team for blockchain, EON protocol website creation & deployment. EON token creation & testnet deployment. Deploy contract to mainnet. Contract audit, EON protocol Private sale (whitelist). Public launch and giveaways. Maintain blockchain functionalities and utilities.
