DISCLAIMER

NOT INVESTMENT ADVICE

This document is used for illustration purposes only. It is advised that all SNUB holders and investors take the time to thoroughly understand blockchain technology and digital assets. Understand the potential risks that may come from investing in digital currencies and non-fungible tokens, and take action accordingly.

This document is being used to portray the general infrastructure of Snub Network, and is subject to change at any time seen fit.

The subject blockchain platform “Snub Network” does not guarantee the outcome of said written plans and proposals, none of which shall be defined as any type of solicitation or security offering.

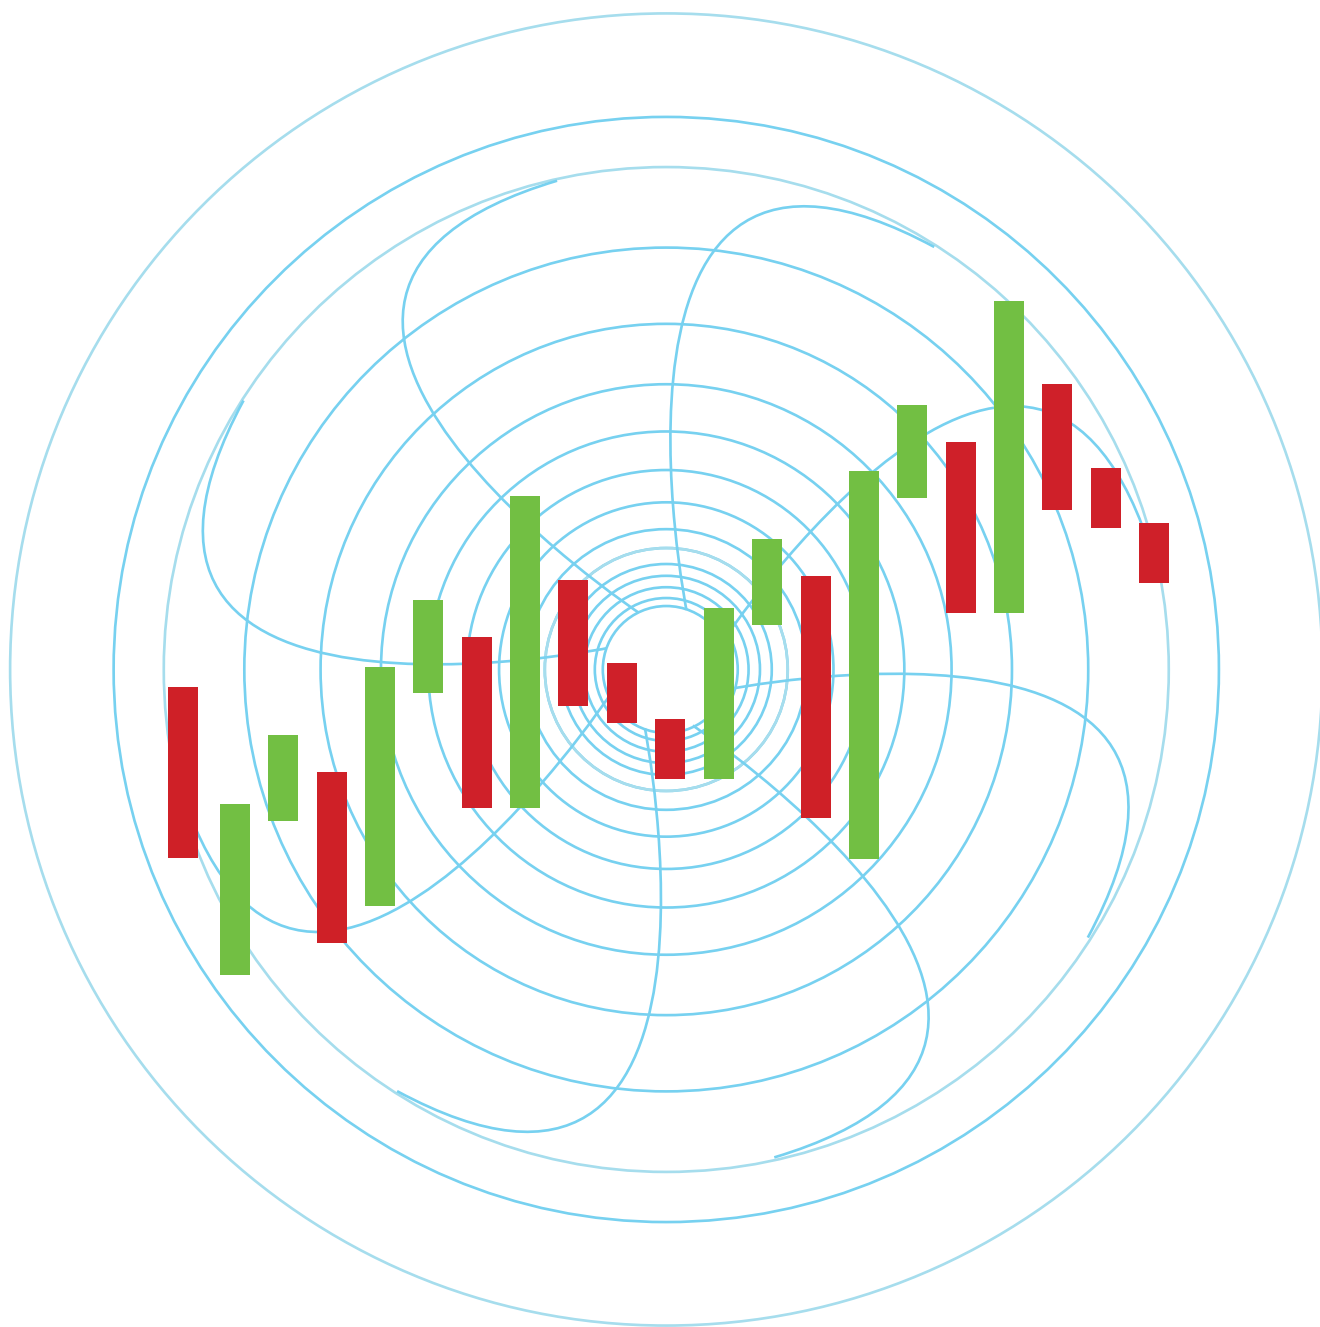

This whitepaper is not created by or subject to any jurisdiction regulations or laws made to secure and protect investors.

INVESTMENT RISKS

There are always risks involved in the purchase of crypto currencies, non-fungible tokens, stocks, etc and the loss of asset value is always a possibility.

If you are new to crypto currencies, non-fungible tokens, or investing in digital assets altogether, seek guidance on making sound investment decisions.

INTRODUCTION

The purpose of this document is to provide clarity and insight into the operational systems pertaining to the “Sovereign Network of Unified Beings” aka “Snub Network”.

The World is changing at a rapid rate as we see a new Golden Age creep closer. As the world shrinks and our reliance on the internet grows, so does the need for quality networks that place the well-being and success of their members as a top priority.

Snub is a multi-chain crypto network focused on the evolution and adoption of DeFi Gaming, NFTs, and Phygital Assets. A tight-knit, vetted network where great minds can come together and build something special through collaboration. The Snub Network team is striving to create practical applications in its adoption of Blockchain Technology.

In giving clarity and transparency to Snub Network’s team members, operational mechanics, network structure, affiliations, developments, and asset holdings, we know the integrity of the Network will give way to a thriving environment and economic safehaven for its community. Ensuring faith to its ambassadors in assured practices; providing a foundational platform to create a stable and unique community structure.

DOING OUR PART FOR THE WORLD

The Network aims to create ecological programs which ensure sound and environmentally friendly practices to maintain harmony with the earth and help to reduce the carbon footprint.

Creating sustainable and renewable systems are of the utmost importance today. The Network Team commits to ensure sustainable practices and stand as an example for other entities to embody our values.

We are excited to serve in ways that create symbiotic relationships in nature and leave the Earth a better place than when we found it. We are focused greatly on creating/partnering with charitable projects who do good in this world.

BEDROCK FOUNDATION

Snub Network's bedrock foundation is comprised of its member community and art-rich culture, offering utility to its members and users by positioning its NFT marketplace, and the work of its members as a multi-chain hub between the XRPL and Hedera Hashgraph chain rails.

This approach gives the marketplace a wider reach and steadfast trajectory by acting as a bridge between the two chains whilst allowing a platform for community to thrive and create with the tools and amenities to give NFT's a collaborative, fun, creative, sociable experience; evolving the way that individuals and community interact. Launch, buy, sell, support, and venture in the world of NFTs.

BEYOND NFTS

PHYGITAL ASSETS

From Metaverse to Physical Concrete Reality, there is a gap. In between these two realities resides the space and potential to connect something significant. At Snub Network, we know the answer to coupling the physical and metaphysical is through NFT's.

[The way we use digital systems to record data assuring accurate account and measure for efficiency and quality control of operations has proved to be an answer that has removed the potential for human mistakes and error in business.]

In the maturing Internet of Things (IOT) accounting, control, and retention of property (both physical and digital) holds importance to its keeper(s) whether individual, party, or business. It is obvious that physical goods will always hold their place in our world. Now, as the new constructs of metaphysical data and metaverse reality unfold and blossom, we find it important to highlight the opportunity we have in every transaction of physical goods, to assign metadata that holds utility in the transaction for the purpose of account, as well as utility to the consumer or owner by creating a virtual property that could hold value such as usage in metaverse game play when physical goods are purchased.

The brink of innovation in the IOT is where the Physical meets Digital. As the bridge between, we know “Phygital property” boasts such an important opportunity to create nuance and innovation in the way we aim to better experiences in commerce bridging the gap between, giving physical goods, digital advantages.....just imagine the name-brand sneakers you just purchased giving your gameplay avatar a pair too allowing a boost in their speed and jump stats!!

Snub Network aims to service its marketplace with tools and amenities by offering solutions to creating physical goods, or metadata for physical goods, services and products listed and offered by its members on the Snub App platform.

Living in a world that is already utilising digital tools and systems to measure, account, and log data for efficient operations, it is more than apparent that the world is constantly evolving to systems that remove the potential for human error and mistake.

Between the inventory of ingredients of business operations on the back end of a brick and mortar restaurant business to the fulfilment of a customers remote order from inside Metaverse game play to have food delivered. NFT's offer the solution with compartmentalising key data and information in each and every transaction that can be stored logged and handled by the network

XRP/HBAR UTILITY

XRPL - LAYER 1

Snub Network is utilizing the XRP Ledger as a layer 1 solution, by way of SNUB [the network's native currency]

HBAR - LAYER 2

HBAR will be utilized as a layer 2 solution within the network, which will provide added functionality and the ability to connect to several different wallets

APPLICATIONS

Financial Backend

Orange Reserve Pool

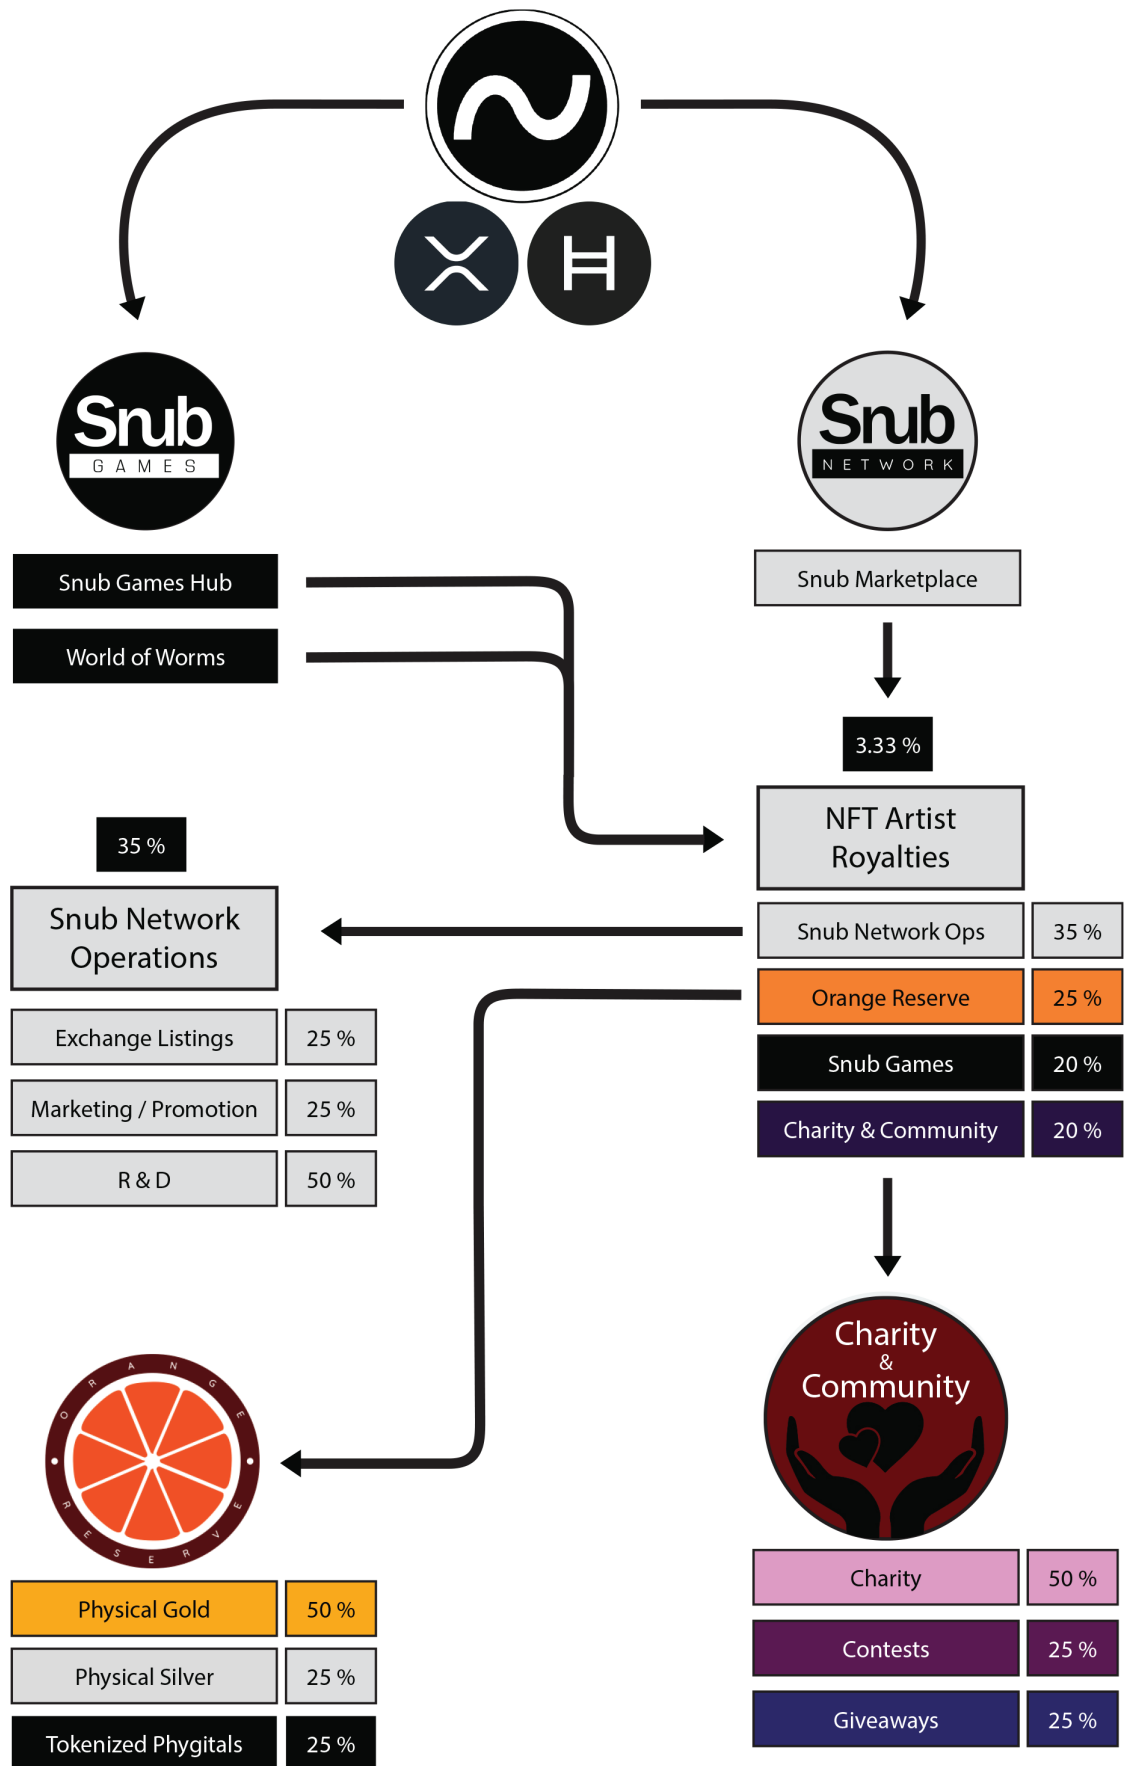

Snub Network Marketplace

Snub Games Hub

NETWORK MECHANICS

Snub

G A M E S

The Key to the Snub Network is the community network, the catalyst to creating a unique community culture that thrives is by providing the community a platform to interact, as well as a voice and a place to help shape and sculpt the constructs of a project that everyone is happy and proud to be participating in.

In a means to nurture and support the community life blood to the Snub Network, Snub Games acts as a catalyst for the community by involving its members in its developments to show support and interest of its member community.

Snub Games aims to innovate metaverse reality gaming with the use of metadata NFT's ranging from land ownership to different smart object items that provide usage and utility inside the gameplay experience. Ranging from character avatars, tools, equipment, virtual land ownership, and more; these unique NFT's will be acquired in game and/or made available for purchase on the Snub Network & Snub Games Marketplace..

By constructing its very own unique metaverse virtual reality with its pilot project, World of Worms, Snub Games is eager to add layers of culture and community to the Snub Network by offering the community a world of their own as a community platform to explore and experience while having a place to express their voice, and hand in shaping the constructs, direction, and dynamics of gameplay and the environment in the World of Worms.

Players Avatars for World of Worms are a part of the pilot collection of NFT's on the Snub Network, and will be made available through the launch of the Snub Network Marketplace.

IN-GAME REWARDS

All games will boast an ecosystem for rewarding players

MARKETPLACE

Game Items, both Cosmetic and Functional, will be available on the Snub Marketplace and Snub Games Hub.

MISSION

NETWORK MEMBERS FIRST

Snub Network's mission is to provide a safe, secure platform in which community members, artists, developers, and investors are given the opportunity to participate in the direction of the network and its on-going developments within the XRPL and HBAR ecosystems.

As a network that cares about the well-being and success of its members, everything will be done to cultivate a loving, passionate community that strives for greatness and the betterment of others. Backed with the tools and guidance needed to ensure success, network members will be part of an exciting, shared experience on a network designed for and by its users.

TOKENOMICS

\$SNUB

Blockchain Network

XRP

Total/Max Supply

77M

COMMUNITY

20%

(15.4M)

20% of all SNUB Tokens will be distributed to the community throughout 2022 and 2023 by way of contests, giveaways, & airdrops.

SNUB GAMES

26%

(20M)

26% of all SNUB Tokens will be utilized for the purpose of developing DeFi Games, NFTs, and the Snub Games Hub.

NETWORK OPS

33%

(25.4M)

33% of all SNUB Tokens will be used for network operations, marketing, exchange listings, partnerships, and much much more.

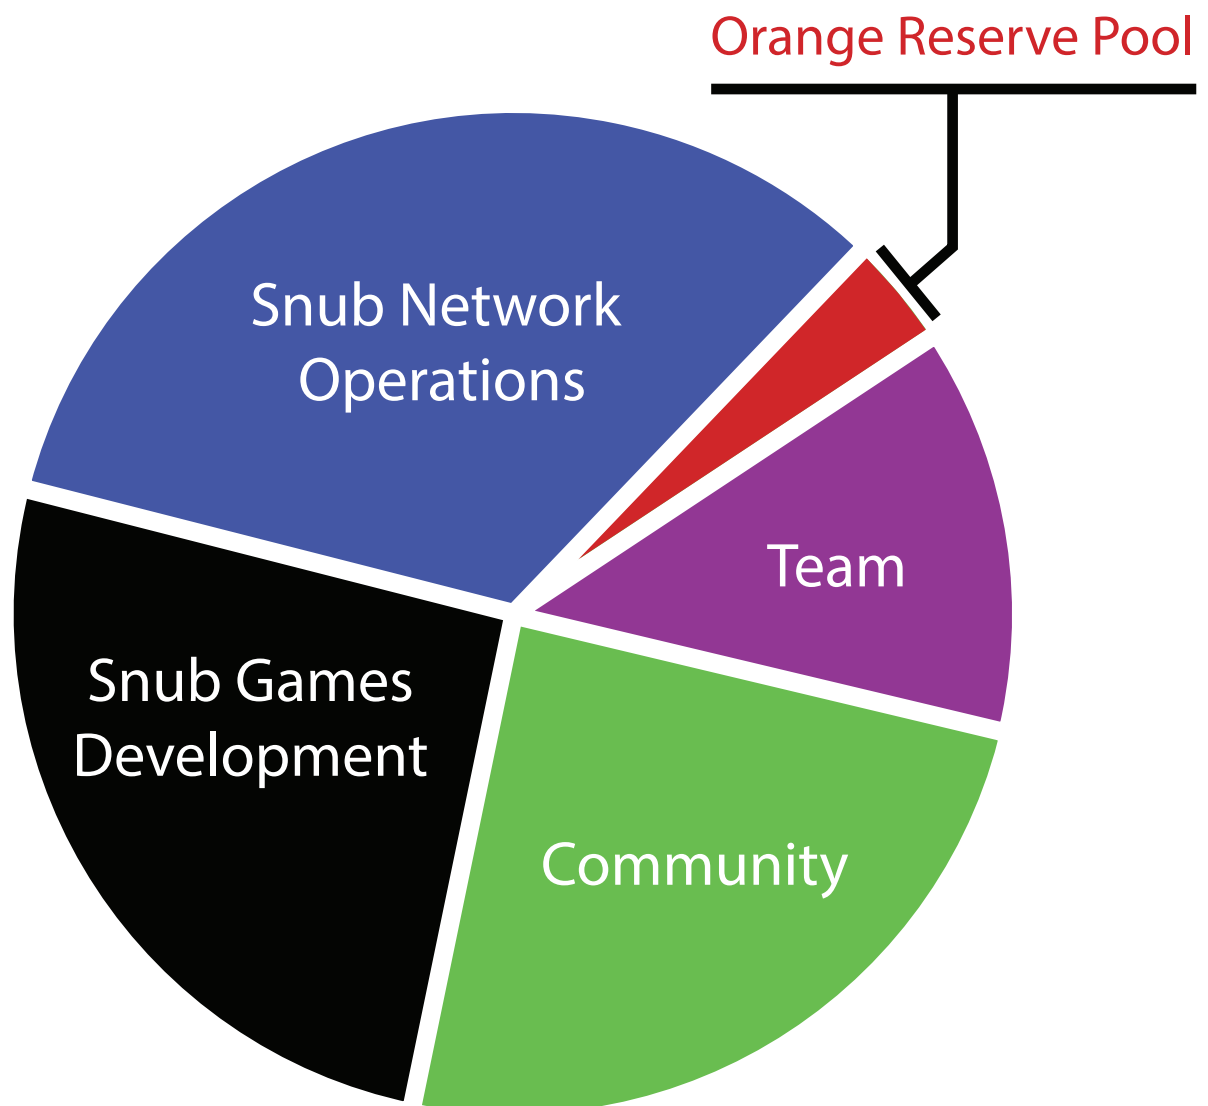

TEAM WALLETS **15%** **(11.5M)**

15% of all Snub Tokens will be distributed to Snub Network Team Members. (Developers, Artists, Marketing Team, etc)

ORANGE RES. **6%** **(4.6M)**

6% of all Snub Tokens will be staked into ORG (Orange Res.) in order to help fund and facilitate PM backing and Shared Phygital Assets.

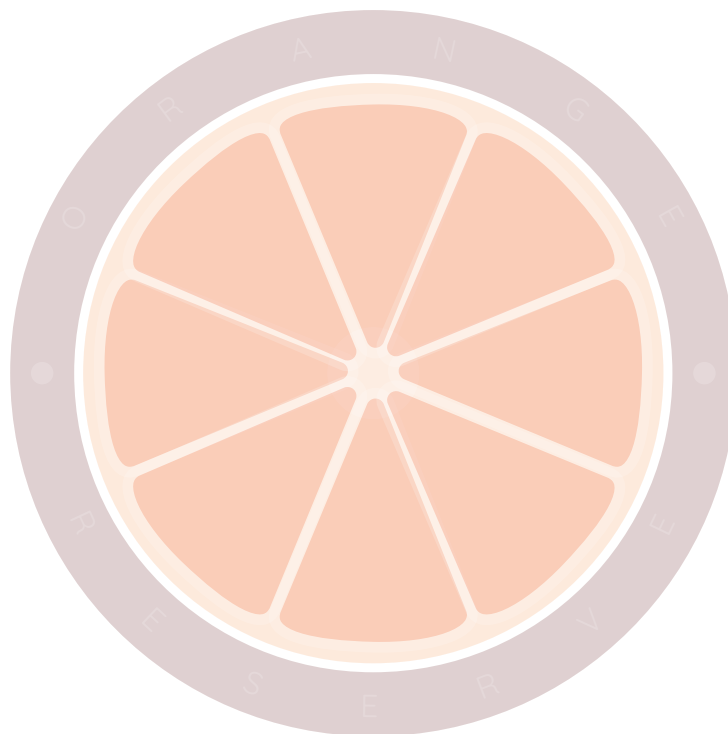

ORG

ORANGE RESERVE

PRECIOUS METAL BACKING

We live in a world where our most common currencies are constantly being devalued. As a result, it is easy to become disillusioned by the actual purpose of currency. It is important to remember that, Currency is defined as: “A medium of exchange for goods and services”. Money, which acts as a currency, holds three duties. First, as a medium of exchange (currency); Secondly, as a unit of account; Lastly, as a store of value.

With the implications of many assets, commodities, and currencies being volatile in nature, maintaining stability in personal or corporate wealth is more important than ever.

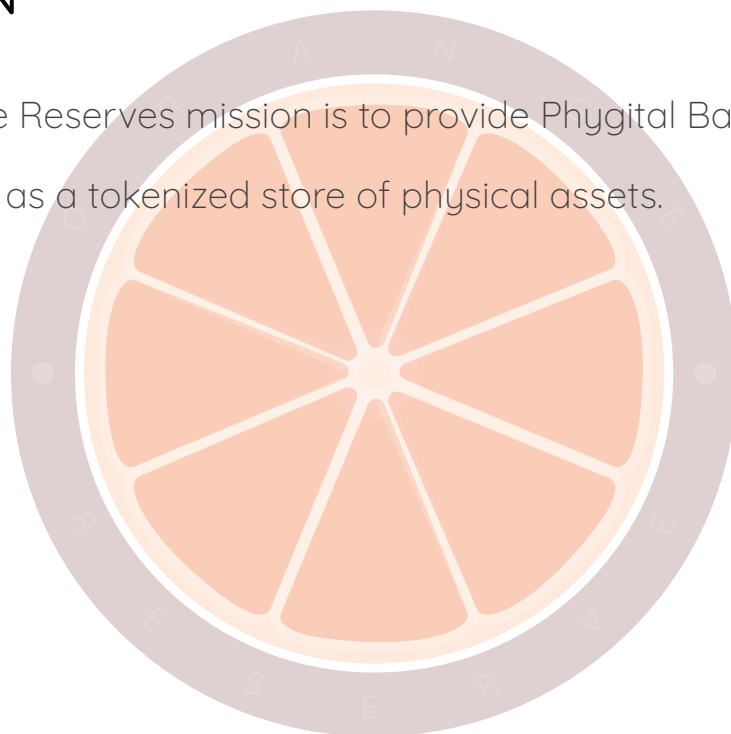

PHYGITAL ASSETS

Precious Metals such as Gold and Silver undoubtably retain value as one of nature's given commodities. They've been proven throughout history to be the ultimate store of account and stable value.

The Snub Network has factored into its ecosystem the implementation of "The Orange Reserve" (a non-profit entity) as an answer to the economic problems which plague common currencies. Through a system of micro transactional fees, whenever a transaction occurs on the NFT marketplace or Snub Games Hub, a percentage of fees are committed into the ORG vault in the form of Gold and Silver Bullion, and are redeemable with the purchase of an Orange Reserve Key (NFT) by staking Snub Tokens into the Orange Reserve.

MISSION

The Orange Reserves mission is to provide Phygital Backing to the Snub Network as a tokenized store of physical assets.

XAI is a project built out on the XRP ledger aimed to harness the unknown powers of AI and bridge the gap between imagination and our ability to create. Our goal is to first create a set of 2500 unique artworks generated and upcaled using modern advanced neural networks, these will be released on the upcoming software implementation on the XRPL called XLS-20D, where you can use XAI to directly claim a minted NFT at lightning speed and near zero cost.

The Future of XAI

As we further move through this next frontier of understanding and transition to a more decentralized digital dominant future, we plan to be alongside innovation, and take charge to innovate and incorporate new components and changes to enhance our project's unique vision and create something extraordinary.

Plans for the future currently include a 3D metaverse museum, that would allow users in the metaverse to browse all 2500 artworks in one single environment, offering incentive to browse using giveaways and draws based on players leaving comments on artworks, or entering their names into raffles to be drawn to win artworks. XAI metacards can be purchased and will allow users multiple bonuses within the museum, allowing access to VIP rooms, with different attractions, high stakes betting, VIP artworks, allowing for an all around fulfilling experience. Card holders also will gain free holder rewards in the form of XAI just for being a member, where the higher status card they have, will allow for higher percentages in rewards to be made.

Another bold idea for XAI and its future is to implement the use of Artificial Intelligence directly through our platform and museum, allowing users to use tokens in exchange for creating their own AI generated artworks they can use as a souvenir, mint as an NFT, etc. This can also be used to branch out to allow for wider use cases of neural networks, such as sound splicing, problem solving, website designing, and more all within the platform environment.
