INTRODUCTION

The team behind Gogeta Inu is passionate about Dragon Ball Z and the universe it is set in. It was the beginning of our journey into Anime as a whole. To be part of a project that means something to a lot of us is a surreal experience. The team wanted to give back to Dragon Ball Z and the community it is set in by combining the two things that we care about: Dragon Ball Z and cryptocurrency. This is our way of combining two communities we care the most about. We are honored to unite the Anime community with the crypto world and create something remarkable.

THE STORY

Saiyan Prince Vegeta and the Saiyan raised on Earth, Goku, have once again shattered their own limitations and surpassing that of a God! The two of them have reached Super Saiyan Inu. To combat their newfound foe, the two of them have once again fused together resulting in their new combined form, Gogeta Inu!

Gogeta Inu has one mission in mind, and that is to protect the Blockchain; to put an end to any villains that dare cause harm to the human race! With the newly acquired form, Gogeta's ultimate ability targets the Ethereum Blockchain. Help the Saiyan Warrior continue to reach his ultimate potential by purchasing and holding \$Gogeta, to help him battle his enemies in the Cryptoverse!
