## OUR MISSION

#WEARESENSEI  
THE MENTORING FOR ALL

Our mission is to secure the exchange of knowledge around the world.

We want to connect a maximum of people and values in a dedicated space, facilitating the transmission of knowledge in all fields that can be transmitted and taught by a qualified person.

Our ambition is to profoundly reinvent knowledge exchange by creating a virtuous ecosystem around the knowledge economy and blockchain.

Users brought together in an intuitive, free and efficient platform to provide access to quality, verified learning for anyone in the world who wants to improve in their chosen field.

Every barrier we cross brings us a little closer to our dreams. Let's become together the best version of ourselves.

# CONTEXT

"The purpose of life is to develop, to realize oneself completely, that is our function on earth." Oscar Wilde

## TODAY, MANY COACHES PROLIFERATE ON THE INTERNET

Complete strangers claim to be "coaches" and promise you wonders, taking advantage of many people seeking to improve themselves. In fact, more than 80% do not apply their teachings, have stopped learning or do not get the results they claim.

## YOU ARE THE AVERAGE OF THE 5 PEOPLE YOU SPEND THE MOST TIME WITH

Imagine meeting with people who can help you get ahead, having a regular appointment with one or more successful coaches in your chosen field. Your coaches could share their validated knowledge with you. Being there for you, master new knowledge and access a new reality.

Together with the Blockchain revolution, we are building a virtuous ecosystem ecosystem offering personalised education services to the general public.

## AN ORGANISED COLLECTIVE

A project bringing together entrepreneurs with a common vision to secure, reinvent and improve the exchange of knowledge around the world.

#WEAREONE #WEARESENSEI

## A COMMON MISSION

Access to verified knowledge in line with the evolution of our society. Let us become free by learning from the best.  
Of the People, for the People, by the People!

## HYPER TRANSPARENCE

To increase trust, Sensei Protocol provides all the necessary documents for full transparency.

The Knowledge Economy is the fastest growing market of this decade!  
It is worth over \$6,000 billion.

## INSIDE & OUTSIDE THE METAVERSE

Join global events and experience the adventure together in a real Metaverse (or not).

# OUR VALUES

Let us be the guardians of a common vision. Let us help each other. Let us think long term. And let us face the challenges that lie ahead **TOGETHER.**

## HUMANISM

Together, let's build a virtuous economy that looks like us. For our dreams, for our freedom. In solidarity, each of us can make a contribution. Together we will go far. The collective brain counts!

## HELPING EACH OTHERS

We share the desire for an ethical and honest project that allows everyone to help each other in confidence. Let's achieve our goals and leave a positive mark on this world. **#WEAREONE**

## FREEDOM

A network without censorship. Let's take advantage of the transparency that decentralisation offers to give everyone the chance to learn and be trained. A place without negative ego, no bad energy, only value!

## TRUST

As the blockchain is the foundation of trust, the final objective is that once the smart contracts are perfectly calibrated, this protocol will no longer have any governance and will be the guardian of knowledge.

# THE \$SENSEI

The \$SENSEI is the digital currency used in the SENSEI TEMPLE ecosystem.

## The \$SENSEI can be used for :

## MULTI-CHAIN

By default, \$SENSEIs are BEP-20 compliant, which means that they live on the Binance Smart Chain blockchain.

It provides a fast and cheap alternative for the decentralised DeFi market.

## AVAILABLE ON THE BINANCE SMART CHAIN

BEP20 is a developer-friendly token standard that allows anyone to deploy digital currencies or fungible tokens on Binance Smart Chain.

We want to give our users the ability to move between the two blockchains whenever they want by creating a bridge between the two.

A bridge allows users to migrate their tokens from one chain to the other.

The bridge will work as follows:

- > A user sends their tokens to the bridge on the EGLD/SOL blockchain or other.
- > These tokens are securely locked into the bridge's smart contract.
- > The secure deposit is communicated to the gateway running on the EGLD/SOL blockchain or other.
- > The user is now allowed to withdraw an equivalent amount of tokens on the EGLD/SOL smart chain or other in his wallet.
- > The reverse direction works in the same way. Any \$SENSEI holder will be able to instantly transfer their tokens between BSC and EGLD/SOL or other.

Being available on both the Binance smart chain blockchain and the EGLD/SOL or other, it will be possible to trade \$SENSEI on decentralised/centralised exchanges such as Solana, Elrond and Pancakeswap (BSC).

# NFT QUALIFICATIONS

IMMORTALISE YOUR CAREER THROUGH NFTs

> When NFTs replace diplomas and CVs, they are improved in terms of security and ease of verification of one's credentials. NFTs will also reduce the risk of forgery and fraud.

> Thus, following a coaching session, group coaching, strategic call or physical meeting, the coach will be able to distribute a diploma in the form of an NFT to give recognition to his/her student(s).

> When students create projects, they do not keep the files independently, even if they do not involve third-party material. Some of the work created by students is used as reference material by teachers, and the student is hardly recognised as the creator.

> In this regard, Sensei also wants to be able to offer everyone the possibility of immortalizing their work in order to retain ownership of it and thus generate a profit. Moreover, a function in the messaging system will allow all Sensei Temple users to immortalise and time-stamp a discussion or a personal reflection.
