# Team

Our team is located in Melbourne Australia, we have many years of experience managing teams within the technology industry, during this time we have had various responsibilities which include project delivery, marketing, strategy development and product design.

We are working with a very talented Blockchain Developer located in Melbourne who is very experienced in BEP2 and ERC20 contract development.
Our unique array of skills and shared passion for cryptocurrency has enabled us to develop a token that creates an innovative take on passive income earning.

# Why SuperFuel

SuperFuel was conceptualised out of our passion for DeFi, particularly the SafeMoon token.

We also experienced many start-up tokens in this space with that had many challenges via poorly designed contracts, unsustainable pools, inexperienced developers and many many scams.

SuperFuel brings all of our trials and tribulations along with the best mix of contract features and conditions and provides a great reliable, long term sustainable token to reward our holders.

Our passion for the community and shared success strategy and ongoing marketing focus will drive the token through all the stages of its lifespan.

# Vision

We want to assist with the ignition of the SafeMoon rocket by increasing the volume and value of transactions through tokenomics. This will assist to drive the deflationary trajectory of SafeMoon by increasing the burn rate as well as boosting wealth production of both SuperFuel and SafeMoon communities.

SuperFuel aims to do this by:

- Rewarding holders of SuperFuel with BNB tokens airdropped directly to their wallets.
- The SuperFuel contract will regularly purchase the BNB token for redistribution.
- The billionaire's wallet will accumulate SafeMoon until it reaches 1.2 billion tokens. At this point the contract will randomly select one wallet holding SuperFuel and automatically sends it 1.2 billion SafeMoon tokens. The billionaire's lotto could go off at any time and very frequently during high volume periods.

# Road Map

**We have**

## Phase 1

- **Contract development**
- **Deploy website**
- **Initiate socials**
- **Build the SuperFuel community and engage the SafeMoon community**
- **List on CoinSniper**
- **List on CoinHunt**
- **List on CoinVote**
- **Presale whitelist competition**
- **Presale on Dx Sale**

## Phase 2

- **Launch on Pancakeswap**
- **CMC fast track**
- **Coin Gecko fast track**
- **DexTools trending**
- **First post launch competition**
- **TrustWallet Logo**
- **Youtube and Twitter influencers**
- **Contract Audit**

## Phase 3

- **Website Revamp with advanced features**
- **Dapp to show SafeMoon rewards, lottery winners, volume**
- **More competitions to increase volume**
- **Exchange listings**

# Tokenomics

**Total Supply: 1,000,000,000,000**

- **5% Marketing (50,000,000,000)**
- **5% Team (50,000,000,000)**
- **2% DXsale Fees (20,000,000,000)**
- **45% Presale (450,000,000,000)**
- **25% PCS Liquidity (250,000,000,000)**
- **11% Burn (110,000,000,000)**
- **7% Locked in Contract (70,000,000,000)**

# Fee Structure

## Buy/Sell Tax 19%

**2% Automatic LP**

Every trade contributes to the liquidity pool to help create stability

**3% Marketing**

A portion of each transaction is converted to BNB and added to the marketing wallet so that we do not have to sell SuperFuel to pay for marketing

**7% BNB Reflections**

7% of every transaction is converted to BNB and automatically airdropped to holders

**5% Billionaire's Lotto**

5% of each transaction goes toward adding more of the community to the billionaire's club

**2% Intelligent Buyback**

The intelligent buyback system kicks in when large sells are detected. This will keep the chart looking healthy and reduce the red candles

# $SFM Billionaires Lotto

So many members of the SafeMoon community dream about increasing their holdings to reach the 1 billion club. We want to help people live their dreams. Our billionaire's lotto works like this:

- 5% of every SuperFuel transaction is automatically converted to SafeMoon and added to the billionaire's wallet
- When the billionaire's wallet reaches 1.2 billion SafeMoon tokens the lotto is triggered
- The SuperFuel contract randomly selects 1 wallet holding which fulfills these criteria:
    - Wallet holds at least 100,000,000 SuperFuel tokens
    - Wallet has not sold or transferred any SuperFuel in the previous 48 hours
    - The wallet did not win the last billionaires lotto draw (a wallet can win multiple draws but not 2 in a row)
- 1.2 billion SafeMoon will be automatically sent to the winning wallet
- SafeMoon tokenomics wall deduct 10% tax
- Winning wallet receives 1 billion SafeMoon and the winner joins the billionaires club

At every transaction the contract will check the billionaire's wallet to see if it has 1.2 billion SafeMoon. This means that the lotto could go off at any time. During high volumes of trade, the lotto could go off multiple times per day.

# Launch & Presale

**SuperFuel will be available for Presale on 2nd September, 2021**

**How will it work?**

- **The presale will be hosted on Dx Sale. Dx Sale is the most popular and reliable platform**
- **Presale maximum contribution will be 1.5 BNB with a minimum of 0.3 BNB.**
- **Presale with low hard cap and small maximum contributions to prevent dump at launch**
- **Whitelisted presale to prevent bots**
- **Following the presale, the SuperFuel team will provide an update on when $SFUEL tokens will become available for purchase on PancakeSwap.**

**Hard Cap:** 200 BNB

**Soft Cap:** 100 BNB

**Min./Max. Contribution:** 0.3 – 1.5 BNB

**Presale Rate:** 2,250,000,000 per BNB

**Pancake Swap Rate:** 2,000,000,000 per BNB

**Estimated Market Cap:** $220,000

# Extra Features

**Rug Proof**

**Liquidity locked at launch for 1 year**

**Contract Ownership Renounced**

**Promotions**

**We will be using the marketing wallet to run regular advertisements and promotions to encourage investors to buy and hold SuperFuel.**
